POCO's Himanshu Tandon talks about the new Poco F5 5G, expansion plans for India and more

"The smartphone industry is constantly evolving, and manufacturers need to innovate with the changing expectations of consumers"

Sushant Talwar | feedback@digit.in

POCO launched its latest entrant in the market, the F5 5G. It's an upper mid-range device, that's built using POCO's core DNA in mind — performance. But as we found out in our review, it's also a device that offers more than just gaming to users. The cameras are good for the price, and it also brings with itself an impressive 12-bit display, a first for the segment to shake up the market. On the

sidelines of its launch in India, we got in touch with Himanshu Tandon, Country Head, POCO India to understand what went into making this new phone, and the company's plans for the rest of the year.

Q Tell us about the POCO F5 and what sets it apart from previous models and other smartphones in its price range?

A The POCO F5 is made to continue

the legacy of being the most potent smartphone POCO has ever released. With an Antutu score of around 1Mn, it distinguishes out as the first smartphone in India to debut with the Snapdragon 7+ Gen2 processor. The new chipset in the POCO F5 5G delivers lightning-fast performance for gaming, streaming, and multitasking activities. As well as a 16MP front camera perfect for taking selfies and taking part in video conversations, the POCO F5 also includes a triple camera setup that ensures stunning photos with remarkable sharpness and clarity. Featuring a 64MP primary camera, an 8MP ultra-wide camera, and a 2MP macro camera, the smartphone boasts new camera modes for trendy content creation. An uninterrupted and lag-free experience is made possible by the cutting-edge vapor cooling system, 120Hz refresh rate, and 5000mAh battery, especially throughout the day without having to worry about running out of power. The POCO F5 is a strong contender in its price category thanks to the 12-bit AMOLED display's vivid colors and clear images, which improves the overall viewing experience.

Q POCO F5 will come with the latest Snapdragon 7+ Gen 2 chipset, what does this mean for the end consumers?

A POCO F5 is a testament to POCO's commitment to delivering exceptional performance and durability in its devices. It comes equipped with the latest and most powerful processor from Qualcomm - the Snapdragon 7+ Gen 2, which boasts a similar architecture to the Snapdragon 8+ Gen 1. Moreover, it offers over 50% more CPU performance and 13% better power efficiency than its predecessor Snapdragon 7 Gen 1. In addition to this, POCO F5 5G uses a 3725mm² Vapor Chamber coupled with 14 Layers of Graphite sheets. The VC comes with diversion grooves which improves the heat dissipation capacity. As a result, the POCO F5 5G offers remarkable
