

HEALTH & FITNESS TRACKERS FOR ELDERLY

- **Fitbit Charge 5:** The Charge 5 is a reliable fitness tracker with a clear 1.04-inch OLED display. Essential features for elders include optical heart rate monitoring, oxygen saturation (SpO2) checks, skin temperature measurement, and compatibility with ECG & EDA Scan apps. It boasts a 7-day battery life, which might vary with usage like continuous SpO2 monitoring. This device ensures older adults get comprehensive health insights without frequent charges.
 - **Mi Smart Band 7:** Mi Smart Band 7 offers fundamental health metrics like steps, sleep tracking, heart rate, and blood oxygen levels. Unique to this band is menstruation cycle tracking and breathing monitoring. Lightweight and comfortable, it's suitable for daily wear, though elders must manually log exercises.
 - **Samsung Galaxy Watch 5:** Running on Wear OS 3, the Galaxy Watch 5 brings advanced health tracking: SpO2 measurements, sleep metrics, and an electrocardiogram.
- Auto-workout detection means elders won't need to manually start exercise sessions. The interface is user-friendly, ideal for seniors not familiar with tech-heavy devices.
- **Apple Watch 8:** Perfect for iPhone users, the Apple Watch Series 8 introduces a skin temperature sensor for more accurate sleep data and menstrual cycle tracking. With varied workout modes and automatic workout detection, it covers a wide range of activities. The new crash detection could be pivotal for elders.

ELDER-FRIENDLY APPS

- **Dozee (Android & iOS)** - Dozee offers seniors peace of mind with its under-mattress device that monitors sleep vitals. Sleep is vital as we age, and having an insight into our nightly rest can lead to improved overall health. By pairing the Dozee device with its app, older individuals gain a comprehensive view of their sleep health, ensuring they remain attentive to their well-being.
- **Empowerji (Android & iOS)** - Seniors often feel left behind in our tech-driven world. Empowerji bridges this gap, catering especially to Indian seniors. This app offers easy tutorials to help the elderly become tech-savvy. It simplifies technology, making it less intimidating and more accessible, empowering seniors to embrace the digital age confidently.
- **Magnifying Glass + Flashlight (Android & iOS)** - Struggling to read small prints becomes a common challenge as we age. The Magnifying Glass + Flashlight app enhances visibility by magnifying texts and providing additional lighting. Be it restaurant menus or prescription labels, this app ensures clarity, making reading hassle-free for the elderly.
- **Lumosity (Android & iOS)** - As we grow older, keeping our minds sharp becomes crucial. Lumosity offers seniors a collection of enjoyable games tailored to enhance memory, problem-solving, and processing speed. Every day brings fresh challenges, ensuring a stimulating mental workout. It's not just fun but also provides valuable insights into one's cognitive abilities, keeping the aging brain active and agile.
- **MyTherapy (Android & iOS)** - Language barriers or forgetfulness shouldn't compromise one's health. MyTherapy, available in 30 languages, assists in managing medications.

OTHER SMART TECH FOR ELDERLY

- **Smart Medication Dispensers:** These devices dispense medication at the right time and in the correct dosage. They can be integrated with smartphone apps, sending reminders and notifications. They can help reduce medication errors, provide reminders, and can alert caregivers or family members if a dosage is missed.
- **Connected Home Security Systems:** Things like IoT-enabled cameras, door sensors, and motion detectors enhance home security. It helps provide much-needed peace of mind, detects intruders, and can integrate with emergency services.
- **Voice-activated Assistants:** Devices like Amazon Echo or Google Home can follow voice commands to control other smart devices, answer questions, set reminders, or make calls. They can assist with routine daily tasks, provide reminders, and offer hands-free control over the home environment.
- **Smart Lighting Systems:** Lights can be controlled through voice, motion, or app or Alexa-smart speaker integration. They can adjust based on time of day or activity. They help prevent accidents due to poor lighting and can help regulate sleep patterns with color temperature adjustments for seniors.
- **Connected Refrigerators and Nutritional Trackers:** Smart fridges can track food consumption, expiration dates, and even suggest healthy meals. It encourages a balanced diet, reduces food wastage, and can be synced with health apps to track nutrition.
