

Ookla CEO Doug Suttles on Satellite Internet services, India climbing the ranks on the Speedtest Global Index, and more

We spoke to Doug about all things related to India's internet scenario

Dhriti Datta | dhriti@digit.in

Ookla is almost synonymous with the word 'speed test' given the immense popularity of the company's Speedtest by Ookla webpage. We bet a large number of our readers have used their useful internet speed analysis service at some point or other in their life. However, this web testing and

Doug Suttles
CEO & Co-Founder, Ookla

network diagnostics company – which was founded in 2006 – dabbles in other avenues.

As we found out in an illuminating conversation with Doug Suttles, CEO and Co-Founder at Ookla, the company even measures latency in video and gaming experiences and has publicly available resources to provide companies with meaningful data. We also spoke to Doug about satellite internet services, the number of speed requests Ookla processes daily, how 5G has caused an uptick in internet speeds in India, the meaning of Ookla, and much more!

Q How will satcom change the Telecom space, specifically in India?
