

industry's first Auto-zoom Technology Integrated subject detection model and automatic cropping model that allows professional photographers to carry out the aesthetic composition of 10,000+ photos, rendering millions of matching images for data training. This feature is integrated into the street photography mode, which can accurately identify the user's click area and intelligently match the composition area, forming master composition images.

Automatic Brightness Adjustment: In order to optimize the screen backlight experience of the realme narzo 60 Pro 5G, the industry's first 20,000-level Automatic Brightness Adjustment expands the original backlight level of the screen, reduces the physical brightness differences between similar backlight levels, and monotonically smooths the actual physical brightness of the screen, making more accurate and delicate backlight brightness adjustment.

HyperVision mode: The realme narzo 60 Pro 5G is provided with industry-leading video image quality enhancement technology to dramatically enhance the video viewing experience with Video Color Boost and HDR video highlighting features.

Dash memory engine: 4 major technologies of the bandwidth instant technology pioneered by the realme, as well as intelligent preloading, asynchronous memory management, and APP breakpoint reading, can ensure faster switching and start-up of APPs and more background active APPs. With the support of the dash memory engine, not only there is no sticking in multi-application switching, but also the background can be switched in the game safely.

Dual charge pump technology: With the innovative 2:1 dual charge pump solution, the conversion efficiency between the tow charge pumps is up to 98% Charging speed: 47min to 100% charge, 18min and 21s to 50% charge.

Q How seriously does realme take R&D? Could you give us some

insight into the company's R&D process and how many centres are present in India, if any?

A At realme, our focus is on spear-heading significant technological advancements. Hence, we have set up a dedicated institute in India- The Realme Global Institute of Leap-forward Technology. This institute is primarily responsible for collecting and organizing feedback to ensure the relevance and adaptability of realme's products in the Indian market. It enables us to provide faster and higher quality output in technology, product and marketing.

We have expanded our R&D team which consists of 60% of the total employees. The institute focuses on driving innovation across six key areas: charging, photography, display, gaming, chipset and industrial design. We also encourage our technological experts to collaborate and work closely with industry laboratories and other external partners.

Q realme has partnered exclusively with Amazon for its narzo series, while the Number series is present on Flipkart. Could you comment on these partnerships and provide a few statistics to help us gauge how fruitful these have been over the last few years?

A After the resounding success and expansion of our narzo series in India for three years, we have continuously challenged ourselves to push the boundaries of technology and deliver cutting-edge products. With the narzo 'N' series, we took a tech-forward leap, introducing groundbreaking features that set it apart from the rest.

The introduction of the first 64MP camera and the first 33W fast charging technique in the narzo 'N' series has been a game-changer in the smartphone industry. These innovations were a result of our commitment to providing our customers with personalized experiences and our relentless pursuit of excellence. Introducing our narzo products on Amazon has proven to be immensely fruitful. We

were thrilled to witness the remarkable demand for our products, as we sold an impressive 100,000 units of the realme narzo N53 on Amazon in just 90 minutes. Within a matter of hours, the realme narzo N55 emerged as the best-selling smartphone in its price bracket on Amazon.

These statistics reflect the overwhelming appreciation and trust our consumers have placed in realme. Their continued support has been a testament to our dedication to delivering top-notch products and experiences in the competitive smartphone market.

With the narzo 60 5G series, we aim to disrupt the smartphone category on Amazon by introducing mid-premium smartphones that are power packed with excellent performance, design and best in class features.

Regarding our association with Flipkart for the Number series, we are equally committed to providing exceptional devices and experiences to our customers through this platform. The Flipkart partnership has allowed us to expand our reach and cater to a broader audience, showcasing our innovative offerings to a diverse user base.

The realme Number Series has been adored by users worldwide, with over 50 million users globally and 32 million users in India, and the number is increasing significantly. The realme 11 Pro+ 5G had its first sale on June 15 and it saw a tremendous response on the first sale day, it has sold over 60K units on the first day of its sale. It is the highest first-sales record above 25K+ Price segment. Moreover we were able to achieve highest First Sale record on Flipkart in 20k to 30k segment.

We understand that innovation is the key to success, and we remain steadfast in our pursuit of excellence. Our exclusive partnerships with Amazon and Flipkart have played a crucial role in making our products accessible to a wider audience, ensuring that more customers can experience the advancements we bring to the market. ■
