■ OS UPDATES

ChromeOS update brings visual changes

Google is rolling out a new ChromeOS update for Chromebooks. The update includes Material You redesign, updated Calendar view and much more.

This update is currently rolling out, so just wait a little while if you haven't got access yet. Here you can check new features and changes included in the latest ChromeOS update.

The new ChromeOS update comes with a new Material you design. You now have more ways to personalise

your laptop based on your taste and style. When you select a wallpaper, you'll also be able to choose from a set of accent colours. Your colour palette choice will dynamically show up across your desktop, quick settings, window header bars, shelf and more. You can try it by right-clicking your desktop and selecting "Set wallpaper". <https://bit.ly/46JEfdJ>

Microsoft Paint will use AI

Microsoft has introduced a new 'Paint Cocreator' feature for its Paint app. The new AI feature can create images with text inputs. It is powered by DALL-E, OpenAI's text-to-image model. "We are beginning to roll out an update for the Paint app to Windows Insiders in the Canary and Dev Channels (version 11.2309.20.0 or higher). With this update, we are excited to introduce Paint Cocreator, a new AI-powered experience powered by DALL-E. <https://bit.ly/46nUMUG>

Google to kill Gmail's basic HTML view in 2024

Google has announced that it will discontinue the basic HTML view of Gmail next year. After this discontinuation, everyone who uses the basic HTML view will be switched to the Standard view. "You can display Gmail on your browser in Basic HTML view until January 2024. After this date, Gmail automatically changes to Standard view," the tech giant said in a support page. According to The Verge, while most individuals opt for the Standard view on their PCs, the HTML version of Gmail comes with its own advantages. The stripped-down Gmail experience loads quickly and is accessible even on older computers or with slower internet connections. <https://bit.ly/3RLrKdi>
