

KILLER RIGS

Be it retro or be it M.E.T.R.O., we've got a gaming PC for your budgets!

By Agent001 | feedback@skoar.in

Here's a very likely scenario - your friend is planning to buy a new gaming PC. Obviously, you would want to help out a dear friend, wouldn't you? You would certainly help him identify the right components, then hunt down the best deals and even accompany your friend as he goes about buying all the necessary components. That's when you realise that you can build a pretty good gaming PC for cheap! And if you can one-up your friend, then there's nothing like it.

Plenty in Fifty! Intel Edition

Explanation: We're going economical folks! Super economical. It's like we woke up and decided not to fall prey to all the upselling tactics that brands like to throw in our faces. Aim for 60 FPS? Heck no! We're fine with 30 FPS. Honestly though, the following configuration isn't bad at all. The Intel Core i3-12100F paired with an RX 6400 makes for a pretty decent combination. You can play Minecraft and a lot of the current-gen video games with some of the settings toned down in this configuration. Also, please don't compare this to a console, for 50K we've also included the monitor here. If you lose that and opt for a more powerful GPU, then you'd have a console equivalent in your hands.

Plenty in Fifty		
Processor	Intel Core i3-12100F	7,952
Motherboard	ASUS PRIME H610M-E D4	7,350
RAM	Crucial DDR4 3200 MHz (2 x 4GB)	3,252
HDD	WD Blue 2 TB WD20EZBX	4,950
Graphics Card	Sapphire Pulse Radeon RX 6400	10,600
PSU	Corsair CV450	3,099
Speakers	None	0
Mouse	Logitech MK200 Wired Keyboard and Mouse Combo	950
Keyboard	Logitech MK200 Wired Keyboard and Mouse Combo	0
SSD	WD SN570 500GB NVMe SSD	2,759
Sub-total (Excluding Monitor)		40,912
Monitor	LG 22MK600M 21-inch 60 Hz	8,429
Cabinet	OEM Cabinet	1,000
Total (in ₹)		50,341

Plenty in Fifty! (AMD Edition)

Explanation: On the AMD side, we've had to opt for a much older processor because AMD has forgotten to release Ryzen 3 CPUs with the new 7000 series. We might see that coming a few years down the line but if we're looking to build a PC now, we need a decent Ryzen 5 5500 (and a decent board) and the rest of the configuration remains the same as above. As with the Intel config, this too is a pretty decent build and should you ever feel that the FPS values aren't sufficient, then switch on a little thing called FSR or RSR. That'll give you more than your money's worth without breaking a sweat.

Plenty in Fifty (RED)		
Processor	AMD Ryzen 5 5500	11,299
