

HIGH TGP RTX 4050 GAMING LAPTOPS

HP Victus Gaming Laptop 16-r0076TX

First up, we have the new HP Victus 16 gaming laptop, which features an RTX 4050 with a TGP of 120W. This laptop features the lowest TGP of the 4050s we're looking at for this batch, but it's not by much. The rest have a TGP of 140W. The Victus lineup is HP's budget gaming laptop lineup. It features the latest 13th-generation processors and 16GB of DDR5, which puts it a cut above the RTX 4050 laptops we've looked at in the previous batch. The Victus also features an excellent display with great sRGB coverage and brightness.

Specs:

GPU: NVIDIA GeForce RTX 4050 Laptop GPU | **TGP:** 120W | **CPU:** Intel Core i5-13500HX | **RAM:** 16GB DDR5 | **Price:** ₹1,29,990

HP OMEN Gaming Laptop 16-wd0xxx

Next, we have another laptop from HP, this time from the Omen lineup, which is HP's premium gaming laptop lineup. Funnily enough, this is actually cheaper than the Victus 16 and actually features a slightly weaker configuration than the HP Victus above. You still get a 13th gen i5 processor paired with 16GB of DDR5 RAM with this one which is pretty good.

Specs:

GPU: NVIDIA GeForce RTX 4050 Laptop GPU | **TGP:** 140W | **CPU:** Intel Core i5-13420H | **RAM:** 16GB DDR5 | **Price:** ₹1,02,990

ASUS TUF Gaming A15 FA507NU_ FA577NU

Our third contender is the ASUS TUF Gaming A15 (2023). This is the only laptop in this article to feature an AMD processor. Other than that, you still have a powerful 140W TGP RTX 4050 and 16GB of DDR5 RAM. The AMD processor puts this laptop in a unique spot, allowing us to see how the new Ryzen 7000 series compares to Intel's newer 13th gen processors when it comes to gaming.

Specs:

GPU: NVIDIA GeForce RTX 4050 Laptop GPU | **TGP:** 140W | **CPU:** AMD Ryzen 7 7735HS | **RAM:** 16GB DDR5 | **Price:** ₹1,05,990

Acer Predator Helios Neo 16 PHN16-71

Our final RTX 4050 laptop candidate is the Acer Predator Helios Neo 16. In addition to having a 140W TGP RTX 4050, this laptop also features the most powerful processor in this list, the 13th gen Intel Core i7-13700HX. In addition to 16GB of DDR5 RAM, the Helios Neo 16 also comes with a bright and colour-accurate display that rivals the HP Victus.

Specs:

GPU: NVIDIA GeForce RTX 4050 Laptop GPU | **TGP:** 140W | **CPU:** Intel Core i7-13700HX | **RAM:** 16GB DDR5 | **Price:** ₹1,29,990

Gigabyte G5 KE (RTX 3060)

Our RTX 3060 candidate for this comparison is the Gigabyte G5 KE which is one of the best performing RTX 3060 laptops we've tested from last year. However, you've got a 12th gen processor and 16GB of DDR4 RAM, both of which are one generation behind the rest of the laptops in this batch. That said, this laptop can still outperform some of the lower TGP RTX 4050 laptops at a similar price point.

Specs:

GPU: NVIDIA GeForce RTX 3060 Laptop GPU | **TGP:** 115W | **CPU:** Intel Core i5-12500H | **RAM:** 16GB DDR4 | **Price:** ₹99,990
