

HP Omen 16 vs. Acer Nitro 5

NVIDIA GeForce RTX 4060 Laptops
Compared to find the best!

Yetnesh Dubey | yetnesh@digit.in

If you're in the market with around Rs 1.30 lakh to invest in a premium gaming laptop today, we delve deep into two standout models in this price bracket – the HP Omen 16 and the Acer Nitro 5 16-inch gaming laptop. Our aim is to compare these powerhouses in every conceivable aspect to help you pinpoint the optimal 16-inch gaming laptop within the Rs 1.30 lakh range.

What heightens the intrigue is the uncanny resemblance in their specifications. This naturally begs the question: Does the Acer Nitro 5 justify its steeper

price or will the HP Omen 16 emerge as the superior option despite its lower cost?

HP Omen 16 overview

The HP Omen 16 is a notable gaming laptop, emphasises its advanced cooling performance. Powered by the AMD Ryzen 7840HS processor, it competes effectively with other gaming laptops in thermal efficiency. The device features a colour-accurate display and a commendable keyboard.

Its design is sleek, housing powerful internals like the NVIDIA GeForce RTX 4060 Laptop GPU, ensuring a seamless gaming experience. The laptop also offers

a variety of ports for easy connectivity. Its redesigned structure includes a “trunk” at the rear for efficient exhaust and cable management. The display boasts an FHD 16:9 aspect ratio with a 165Hz refresh rate.

Acer Nitro 5 16-in overview

The Acer Nitro 5 AN16-41 is driven by the AMD Ryzen 7 7840HS octa-core processor, it promises high-speed performance and multitasking capabilities. The laptop is equipped with NVIDIA GeForce RTX 4060 graphics with 8GB GDDR6 VRAM. The 15.6" FHD IPS display offers a 144Hz refresh rate. The laptop also boasts a 512GB SSD and 16GB of DDR5 RAM.

The laptop's design is both stylish and functional. In terms of connectivity, the Acer Nitro 5 offers a range of ports, including HDMI 2.1, USB 3.2 Gen 2, and more. The laptop also features Killer Ethernet E2600 and Wi-Fi 6.

Design and build quality

From a first glance, it is difficult to tell that they're full-fledged powerful gaming laptops. But look at the massive charging bricks each laptop has and you realise that these machines are indeed packing some serious punch. In terms of construction, hard plastic is still the material of choice
