

Best camera pictures of 2023

Ahead of the Digit Zero1 Awards, we bring you a compilation of some of the best smartphone camera samples from 2023

Dhriti Datta | dhriti@digit.in

Every year we see tons of phones come into the Digit Test Centre. And, as a part of our test process, we click pictures with them and pit them against each other to find out which is the best performer of all. Now, as we near the end of 2023 and close in on Zero1 Awards, we wanted to share camera samples that impressed us the most. These are from the phones that were tested in Mumbai, so it is not the be all and end all kind of list. But, we thought that we must share it with you before we pit all the devices against each other for our Zero1 Awards –

OPPO Find N3 Flip

The OPPO Find N3's primary camera works wonders here. There's oodles of detail and good colour reproduction. The highlights could be better controlled, but this is an amazing shot from a "Flip" phone.

Honor 90

The Honor 90's ultra-wide camera stuns here with a beautiful shot. There is barely any loss of detail towards the edges, and the colours are well-maintained even in the low-light conditions the photo was shot in.
