

Optoma GT2160HDR

The Optoma GT2160HDR is a unique 4K UHD short-throw cinema gaming projector that caters to your cravings for top-tier home entertainment, be it watching movies or engaging in gaming sessions. This projector boasts authentic 4K UHD resolution, delivering a mesmerising cinematic and gaming encounter on a screen reaching up to 300 inches. With an astonishing 8.3 million on-screen pixels, it offers four times the detail of Full HD and twice the pixel count compared to rival tech.

Gamers will especially appreciate the GT2160HDR's lightning-fast refresh rate and minimal input lag. In Enhanced Gaming Mode, it supports a swift 240Hz refresh rate and maintains a mere 4ms input lag, ideal for those seeking the edge in competitive gaming.

The projector's short-throw lens with a 0.496 throw ratio permits projecting a

120-inch diagonal image from as little as four feet away. This proximity to the wall reduces shadows, making presentations a breeze.

Furthermore, the GT2160HDR is HDR10 and Hybrid Log Gamma (HLG) compatible, capable of displaying both HDR10 and HLG HDR content. This results in more detail, texture, and a life-like appearance, enhancing the depth of your viewing experience.

With 4,000 lumens and a 1,200,000:1 contrast ratio, this projector ensures your content is displayed with excep-

tional clarity. It also excels in replicating cinematic colours precisely as intended by the director, surpassing HDTV Rec. 709 standards.

Diverse display options provide optimised performance in cinema, gaming, or 3D modes, delivering images and motion with remarkable smoothness and clarity. The Optoma GT2160HDR truly redefines the projector landscape, offering an unparalleled viewing adventure.

Additional Specifications:

- Noise Level (Typical): 27dB
- Noise Level (Max): 28dB

Logitech Pebble 2 Combo

The Logitech Pebble 2 Combo includes the Pebble Keys 2 K380s keyboard and the Pebble Mouse 2 M350s, making it a valuable addition to Logitech's range of peripherals.

The keyboard provides a comfortable typing experience with its rounded keys and slight indentation, reminiscent of laptop-like keys. It employs Silent Touch Technology to reduce click noise, making it suitable for discreet use, especially in office or academic settings. The keyboard also features Fn shortcut keys for quick access to search engines, screen capture tools, and an emoji menu. Users can customize these keys through the Logi Options Plus app.

The Pebble Mouse 2 also features Silent Touch technology. Additionally, the mouse's middle button can be personalized via the Logi Options Plus app. Both devices are compatible with various operating systems,

including Windows, macOS, iPadOS, iOS, and Android phones, thanks to their Bluetooth connectivity. They include Easy-Switch buttons for seamless transitions between multiple devices. The Pebble Keys 2 keyboard boasts a long battery life of up to 36 months on a single charge, while the Mouse 2 can last up to 24 months. These eco-friendly peripherals are constructed from 50 per cent recycled plastic. So that's a plus!
