

GAMING LAPTOP GRAPHICS CARD COMPARISON

NVIDIA GeForce RTX 4050, RTX 4060, RTX 3060 and RTX 3070 tested and compared

By **Manish Rajesh** | feedback@skoar.in

The world of gaming laptops is constantly evolving. Newer hardware and technologies are constantly pushing the boundaries of what a gaming laptop can achieve. This is especially apparent in the budget gaming laptop segment, which is becoming a lot more capable of handling the impressive games that are released nowadays. Now, when we speak of gaming laptops, the most important piece of hard-

ware would be the dedicated GPU or graphics card. This is what drives your gaming performance. We've got two major players in the market when it comes to laptop GPUs, the most popular being NVIDIA, and AMD following up close behind. We don't speak about Intel Arc. Yet.

NVIDIA GPU Comparison Breakdown

In this comparison article, we're going to be taking a look at NVIDIA's latest budget gaming GPU offerings, which are the NVIDIA GeForce RTX 4050 and the RTX 4060. We've tested quite a few laptops this year featuring the new GPUs. We'll be comparing them with the NVIDIA GeForce RTX 3060 and RTX 3070 from the previous generation. In terms of pricing, all laptops featuring these laptop GPUs currently retail at around the same price range. So, laptops featuring an RTX 3060 are priced about the same as laptops
