Google Pixel 8a dummy unit surfaces on the internet

Google launched the Pixel 8 series last month. The new flagship series features a slight change in design as compared to the Pixel 7 series. Usually, the brand rolls out an affordable version a few months after the launch of its numbered flagship series. It's been one month since the Pixel 8 series debuted in the market. As time passes by, the launch of the Pixel 8a also comes closer. In the latest development, a few pictures of Google Pixel 8a's dummy unit are circulating on the internet. These pictures gave us a slight idea of how the smartphone will be in terms of design. Let's check it out.

These dummy pictures were leaked by No Name in collaboration with xleaks7 on LinkedIn. The major change we could see in the Pixel 8a will be most likely its edges. The upcoming Pixel 8a is said to have more round edges than its predecessor. Furthermore, the smartphone could feature a punch-hole cutout for the selfie camera.

The phone could also see a minor change in its dimensions. The smartphone is said to be slimmer and longer than its predecessor. For the context, the Pixel 7a measures 152 x 72.9 x 9 mm. On the other hand, the Pixel 8a is reported to come with a measurement of 153.44 x 72.74 x 8.94mm.

The rest of the details are the same as its predecessor and other Pixel 8 series smartphones. On the right panel, you will get a 'power button' and 'volume rockers'.

Although, the dummy unit didn't show the SIM tray of the Pixel 8a. In the Pixel 8 and Pixel 8 Pro, the SIM tray is on the left panel. However, in the pictures of the dummy unit, there was no SIM tray. I guess we just have to have some patience now to know more about it.

Samsung Galaxy S24 Ultra appears on NBTC certification

The announcement for the upcoming Samsung Galaxy S24 series is expected to take place in January next year. This lineup is anticipated to consist of three models: the Samsung Galaxy S24, Galaxy S24 Plus, and Galaxy S24 Ultra. Recently, the Galaxy S24 Ultra smartphone model was spotted on the BIS (Bureau of Indian Standards) certification website. Now, the Galaxy S24 Ultra smartphone has made its appearance on the NBTC certification. For photography, the S24 Ultra is expected to house a 200MP primary camera, accompanied by a 12MP ultra-wide lens, a 10MP telephoto sensor and a 50MP periscope lens. <https://bit.ly/3TkeVYm>

OnePlus 12 detailed camera specs officially revealed

The much-anticipated OnePlus 12 flagship smartphone will launch on December 5 in China. OnePlus recently teased the colour options of the upcoming OnePlus 12 smartphone model. Now, the company has revealed detailed camera specs of the OnePlus 12. The upcoming OnePlus 12 smartphone model will house a triple rear-camera setup, consisting of a 50MP Sony LYT-808 primary sensor. The 50MP primary sensor will be accompanied by a 64MP Omnivision O64B periscope telephoto camera, and a 48MP Sony IMX581 ultra-wide lens.
