

Best display phone

Immersive excellence

Smartphones displays are now as good as they get. The best display smartphone is a visual symphony, setting new standards in immersive viewing experiences. It's the epitome of visual excellence, boasting vibrant colors, razor-sharp clarity, and breathtaking detail - all in a compact and handy packaging. With cutting-edge display technology, smartphones can now offer razor-sharp displays that are crystal clear for streaming movies, gaming, or simply browsing content. From high refresh rates to HDR support, they elevate every interaction to a whole new level. For the last few years, smartphone displays are setting new standards in visual excellence, making these compact panels one of the most sought-after one's overall.

Winner: Google Pixel 8 Pro

With the spotlight on Google Pixel 8 series' bugs and misses this year around, the Google Pixel 8 Pro has a hidden gem - its display. The smartphone delivered exceptional colour accuracy, paired with superb luminance and sharpness, along with an extra smooth 120Hz refresh rate, the Google Pixel 8 Pro is a clear winner in this year's Zero1 award for the best display smartphone. The smartphone showcased an average DeltaE of 0.9, which makes the smartphone's display is one of the most colour accurate that has entered the Digit Test Lab so far. It also showcased outstanding brightness, comfortably crossing over 2000 nits in bright sunlight. Furthermore, with the OLED LTPO display, we get a silky-smooth 120Hz refresh rate, which offers both responsiveness, along with an immersive viewing experience that sets it apart from the competition. Overall, the Pixel 8 Pro faced its share of criticism, but the smartphone's display stood tall, making it the undeniable winner of the Digit Zero1 Award for the Best Display Smartphone category.

DIGIT BEST BUY WINNER-2023

Moto Edge 40
Price: ₹29,999

Google Pixel 8 Pro
Price: ₹1,06,999

Best Buy: Moto Edge 40

The Moto Edge 40, being the only sub-Rs 30,000 nominee in the best display category also showcased brilliant display traits. Surpassing devices almost five times its cost, the Moto Edge 40, shines with an impressive average DeltaE of 1.3, showcasing exceptional colour accuracy at a fraction of the cost. The 144Hz refresh rate on the OLED display enhances the fluidity of interactions that's usually reserved for higher-end devices. Further, its outdoor visibility exceeds expectations, boasting over 1000 nits of brightness, ensuring clear viewing even in bright sunlight, a feat that gives the Moto Edge 40 exceptional visual capabilities within a budget. Given this level of display performance at a modest price tag of Rs 29,999, the Moto Edge 40 emerges as the clear winner of this year's Digit Best Buy Award for the Best Display Smartphone category.

Runner-Up: OnePlus Open

The OnePlus Open can be considered the most important foldable smartphone of this year. The main foldable display is extremely accurate, super bright and very bright. The colour accuracy is as good as this year's Best Buy winner, along with peak luminance that also crosses the 2000 nits mark in bright sunlight. Pair all of that with features like Dolby Vision HDR and 120Hz refresh rate, and there is no doubt about why the OnePlus Open finishes second in the race for the Best Display Smartphone in this year's Digit Zero1 Awards.

OnePlus Open
Price: ₹1,39,999
