

Gaming Monitors

The OLEDs are in town

In 2023, the gaming monitor market witnessed remarkable growth and innovation, driven by rising demand and technological advancements. VA panel monitors led the market, acclaimed for their power efficiency and high refresh rates, with OLED monitors gaining traction. Popular screen sizes gravitated towards 27 to 32-inches, favouring higher refresh rates such as 240 Hz and 360 Hz. Notably, 2023 saw a shift from 75 Hz to 100 Hz models, with 165–180 Hz monitors dominating the market share. The Indian gaming monitor market experienced significant growth, influenced by the burgeoning popularity of eSports and an increase in the number of gamers. This surge was further fueled by the availability of more affordable gaming displays, making high-end gaming technology more accessible to a wider audience.

Zero1 Award Winner: **Acer Predator Predator X34 V**

The 34-inch Acer Predator X34 V boasts an UltraWide QHD (UWQHD) OLED screen with a resolution of 3440x1440 pixels, providing sharp and vibrant visuals. Its high refresh rate of 175 Hz and a rapid 0.1 ms Grey-to-Grey (GtG) response time ensure smooth and responsive gameplay, a critical feature for fast-paced gaming.

One of the standout features of the Predator X34 V is its excellent colour accuracy, covering 99% of the DCI-P3 colour gamut. This is complemented by a high peak brightness of 1000 nits, ensuring that images are vivid and detailed, even in HDR. The monitor's 1800R curvature and 21:9 aspect ratio enhance the immersive gaming experience by offering wide viewing angles.

Additionally, the monitor is equipped with AMD FreeSync Premium and Variable Refresh Rate (VRR) technology, pro-

viding tear-free, fluid gameplay. It also comes with a full suite of eye protection technologies, including BlueLightShield Pro, Flickerless, and Eyesafe 2.0 certification, allowing for extended gaming sessions without discomfort.

For connectivity, the Predator X34 V includes dual HDMI ports (supporting up to 100 Hz), a DisplayPort 1.4 (supporting up to 175Hz), and a USB-Type C port. It also has built-in dual 5 W speakers and offers various adjustment options like swivel, tilt, and height for ergonomic comfort.

Runner up and Best Buy: **HP HyperX Armada 27**

The HP HyperX Armada 27 is a remarkable gaming monitor that stands out for its combination of high-end specifications and user-friendly design. It features a 27-inch diagonal QHD (2560x1440) IPS widescreen display, offering a higher resolution for an immersive gaming experience. The monitor is designed to deliver sharp image quality, enhancing the visual appeal of games, movies, and videos.

One of the key highlights of the Armada 27 is its 165 Hz refresh rate and 1 ms response time, which contribute to crisp, smooth visuals, essential for fast-paced gaming. This quick refresh rate and response time ensure that motion blur is significantly reduced, providing a competitive edge in gaming.

The monitor is equipped with NVIDIA G-SYNC compatibility, which helps in eliminating screen tearing and reducing stuttering and input lag, thereby ensuring a more fluid gaming experience. Additionally, it comes with VESA DisplayHDR 400, offering excellent colour contrast and brilliant peak luminosity, which is especially beneficial in varied lighting environments.

Another notable feature of the HyperX Armada 27 is its ergonomic design. It includes a sturdy desk mount as part of an all-in-one package, allowing for easy setup and space-saving on your desk. The monitor supports various adjustments like tilt and swivel, making it versatile for different viewing preferences. **d**
