Biggest iPhone production factory in India to be reportedly built by Tata Group

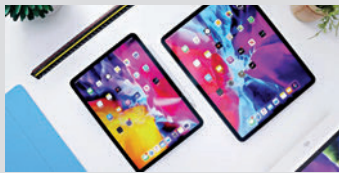

California-based tech giant Apple seems to have set its eyes on India for manufacturing and production. Eyeing the country as an alternative to avoid reliance on China, Apple seems to be pressing on the need to increase its production in India. In the past couple of months, the company spoke to various key players and even partnered with the Tata Group to fast forward its action plan. Now, media reports suggest that Tata

might be getting on board to set up the biggest iPhone assembly plants in India. The Tata Group seems to be on board

with Apple's ambitious plans to push manufacturing in India. Now, we are hearing that the company is planning to set up a factory for the same in Hosur in Tamil Nadu. Sources quoted by Gadgets360 revealed that the Tata Group plans to set up a factory that could house about 50,000 employees along with 20 assembly lines in a matter of two years.

Why did the US halt sales of Apple Watch Series 9 and Ultra 2?

Apple stated that sales of its premium Apple Watch Series 9 and Apple Watch Ultra 2 models would be suspended in the US, which is a significant step taken by the company. The action which took effect in December, was in reaction to an

International Trade Commission (ITC) decision regarding a lengthy patent dispute involving the medical technology company, Masimo. This dispute has originated from several lawsuits that Masimo has brought against Apple.
