

# Smartwatches

Your 24x7 companions

Satvik Pandey | satvik@digit.in

**S**martwatches have witnessed a surge in popularity across India, prompting brands to release their offerings across various budget segments. This trend isn't merely anecdotal but is backed by research studies consistently highlighting India's burgeoning smartwatch market. Both premium smartwatch manufacturers and those catering to budget-conscious buyers face fierce competition, intensifying the landscape. Consequently, the competition in this sphere has reached unprecedented levels. To assist in navigating this dynamic market, here's a curated list of the top 10 smartwatches available in India –

## Apple Watch Series 9

The Apple Watch Series 9 emerged victorious this year, securing the prestigious Digit Zero1 Award 2023 in the Best Performing Smartwatch Category. Rigorous testing encompassing walk tracking, exercise sessions, steps, heart rate, SpO2, and numerous metrics established its

comprehensive superiority over all contenders in the category. Apple's bold claims made during the September launch held true in our extensive examinations.

Display brightness reached a remarkable 779 nits during our evaluations, surpassing others by 1.5 times, showcasing exceptional brilliance. Powered by the S9 SiP, the Watch Series 9 dominated the competition. Our assessments confirmed the watch's 100% accuracy in heart rate and SpO2 testing, alongside superior haptic feedback. Consistently excelling in every test, the Apple Watch Series 9 exhibited unparalleled precision across metrics, surpassing competitors and earning the prestigious Digit Zero1 Award for the Best Performing Smartwatch of 2023.

## Samsung Galaxy Watch 6 Classic

In the realm of Android smartwatches, Samsung's lineup stands prominently for its blend of capabilities and competitive pricing. While options like Garmin cater to hardcore fitness enthusiasts at a premium cost, Fitbit's charm

seems to have dwindled, and other manufacturers focus on budget-friendly offerings. Apple, though a formidable contender, remains secluded within its ecosystem, excelling within but facing limitations beyond its user base.

For those ready to invest, the Samsung Galaxy Watch 6 Classic emerges as a worthy choice, delivering expected features and more, justifying its price tag. Tailored for individuals juggling work, workouts, and daily tasks, it seamlessly transitions through various activities. However, for fitness enthusiasts seeking alternatives, the Garmin Venu 2 Plus stands as a robust choice, while the regular Samsung Galaxy Watch 6 offers comparable specs at a slightly lower price point.

## Samsung Galaxy Watch 5 Pro

The Samsung Galaxy Watch5 Pro elevates the Wear OS experience for Android users. Building on its predecessor's legacy, this year's model significantly enhances every facet of this immersive software journey. Boasting premium materials like Titanium alloy for the case and Sapphire Crystal glass

for the screen, it ensures durability and sophistication. The AMOLED panel delivers a seamless and vibrant display, complemented by cellular calling, smart fitness tracking, and comprehensive navigation capabilities, including turn-by-turn alerts and backtracking features. Moreover, its substantial battery capacity empowers extended usage.

In our rigorous tests centered on performance and battery endurance, the Watch5 Pro excelled remarkably, showcasing exceptional performance and endurance.

## Garmin Instinct 2 Solar

The Garmin Instinct 2 Solar, part of Garmin's Instinct series, has garnered attention for its promises of exceptional battery life and adventure-ready features. Its standout attribute is solar charging, enabling indefinite battery life when

exposed to sunlight. However, for less outdoorsy users, reliance on the included charger is necessary. Impressively, even with active features, the watch lasted around 20 days. **d**
