

# Soundbar under ₹5000

Ultimate productivity on the go!

Satvik Pandey | satvik@digit.in

**T**Vs today are getting slimmer and slimmer, and when you are looking to pick up a TV, especially on a budget, one of the biggest compromises is with the sound output. Most budget TVs today have two 10W speakers, which get the job done for everyday TV viewing, but if you want an immersive movie-watching experience or if you want to enjoy gaming on the TV, then you will have to invest in a soundbar.

A soundbar not only enhances your TV viewing experience but also doubles up as a speaker for you to enjoy music on as well. If you are on a tight budget, then worry not. We list the best soundbar that you can get for a budget of Rs 5000. Just so you know, we haven't reviewed most of these soundbars, so we are listing them based on their features and specifications.

## Xiaomi Mi Soundbar

Xiaomi as a company has a reputation of disrupting the segment in which it launches a product. We

have seen the company do this with smartphones and TVs. Xiaomi did the same with the launch of the Mi Soundbar. Put simply, the soundbar has very good sound reproduction for the price and has elegant looks as well. It has a good array of audio input options. The only downside is the absence of remote control. It may lack a subwoofer, but the soundbar packs enough of a punch to make up for the lack-lustre audio coming from your TV. It does not take much room as well, so you can pack in tight spaces. The bar is hands down one of the best options available under five thousand rupees in India.

## boAt Aavante Bar 1160

The boAt Aavante Bar 1160 boasts of 60 Watts of sound output and is a 2.0 soundbar. The

soundbar comes with four 2.25-inch drivers. For connectivity, the soundbar has Bluetooth, AUX and USB support. The soundbar weighs about 2KGs. It also comes with a remote control that has preset EQs like Music, news movie and more. The sound signature of the soundbar, will be warm, meaning that there will be a hint of boost in the lows (bass frequencies). So, we would say that keep that mind. While it is great for action sequences in movies, if the mastering of the content has not been done well, then you might find it difficult in some cases to listen to the dialogues that are being spoken.

## Philips Audio HTL1045/94

The Philips Audio HTL1045/94 soundbar enhances TV audio, supporting HDMI ARC for 4K

audio pass-through. It provides varied connectivity—Bluetooth, optical input, and USB. With a 2.1 channel setup, it includes a subwoofer and full-range drivers, delivering 45W output and a 10m Bluetooth range. Its adaptable design suits walls, tabletops, or stands, allowing versatile setup. Plus, it enables seamless wireless music streaming via Bluetooth, enriching entertainment without exaggerated praise. You can also wall mount the soundbar. The right of the soundbar also has physical controls.

## Portronics Sound Slick II POR-936

The Portronics Sound Slick II POR-936 is a 40W Bluetooth soundbar. It

offers robust design and solid construction. Equipped with 2 x 20W stereo sound and premium TWS, it delivers beast-like sound. It supports Bluetooth 4.2 BLE for seamless connectivity. It has USB and AUX IN options. This single piece sound system is portable and can be placed anywhere or below the TV. With its solid sound and versatile placement options, it's a great addition to any home entertainment setup. The soundbar weighs a mere 1.8 kgs and has a metal + plastic construction. It can be wall-mounted or placed on a tabletop. The soundbar does not come with a subwoofer.
