Embracing the future with a 'Never Say Never' attitude

In conversation with Realme's
Bazul Kochar on 5G democratisation in India and Making in India

Dhriti Datta | dhriti@digit.in

Q The C-series has always tried to democratize features for the masses. How has the user response been to this series? Can you share its year-on-year growth metrics?

A The realme C series has been loved & adored by users across the globe and has always been one of our key

product lines and we are thrilled to see it being well-received by consumers worldwide. With its exceptional features, the realme C series has proven to be a popular choice among consumers seeking reasonable smartphones. Since our inception, we have shipped more than 100M C Series products. Today, we have a massive user base of 30 million users in India. Through the C series, we aim

to provide our users with cutting edge technology & innovative features at an accessible price point. Our realme C55, launched in March 2023, sold over 100,000 units within just 5 hours of its launch. Within the first 5 months, the realme C55 hit another milestone, achieving 1 million shipments offline. The realme C53, launched in July 2023, achieved over 1 million shipments within just two months of its launch.

Q The C67 brings 5G to the sub-15,000 price point, but your more budget variant – the C51 is still 4G. Would we see a 5G option at the 10K price point like the realme C55 from last year?

A At realme - we never say never! We have always aimed to provide consumers with feature-packed smartphones at accessible prices. We take pride in our ability to pack premium features in a more accessible form factor, ensuring that our devices cater to a wide range of consumers. We continuously evaluate the market and consumer demands to offer products that meet their evolving needs. We understand the importance of accessibility, and we stay committed to providing the best value to our users in India.

Q What are the three standout features of the realme C67 that set it apart from the competition?

A The realme C67 5G offers a powerful Dimensity 5G 6nm Processor Chipset that ensures seamless performance that integrates with the 33W SUPERVOOC Fast Charging technology enabling this device to charge from 1 to 50% in just 29 minutes.

It also boasts several standout features that distinguish it from the competition. The smartphone comes with a sleek 7.89mm ultra-slim Sunny Oasis design that is inspired by the Sunny Oasis, where the bright texture lines, a dazzling lens ring, and a vibrant green back panel create an oasis that is sprinkled with sunlight,
