

Crazy Tech@CES 2024

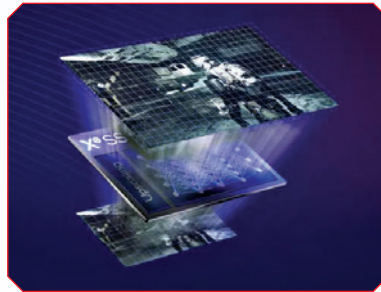

Soham Raininga | soham@digit.in

We were in Las Vegas last month, soaking in all the gadget glory at CES 2024. From self-learning AI robots to flying cars and transparent holographic displays, CES 2024 was all about the craziest tech innovations and demos from all over the globe coming together to make it an experience of a lifetime! We've put together a glimpse of some of the coolest tech we saw at CES 2024, each one with a link to videos on our Instagram channel.

Hyundai's Monster Excavator is straight outta a sci-fi movie. Fully autonomous electric earth mover... anyone?

Intel's way of showing off XeSS performance was truly an experience like no other. Immersive gaming can't get better than this!

<https://bit.ly/30zNN4l>

LG's big story was the World's First Transparent Wireless 4K OLED TV. Yes, that's a lot of cool tech crammed into a TV.

<https://bit.ly/3w7riNK>

This is the new @intel Core Ultra powered @msi handheld windows based gaming console, it's called the MSI Claw running on the latest Intel ARC GPU.

World's first under monitor SoundBar. You'd not make a big deal of it, just like we dismissed it as just another SoundBar.

<https://bit.ly/35NzZ8M>

Closing it with a mashup of electric cars, all screen digital cockpits, flying cars and Hondas electric duos.
