

Acer Swift Go 14 laptop lands in India

Acer Swift Go 14 has been finally launched in India. The brand first announced this laptop during the CES 2024 in Las Vegas. What's special about this laptop is that it comes with a ton of AI features. Moreover, it is powered by the Intel Core Ultra processors and Intel AI Boost. The Swift Go 14 comes with AI features such as Acer AlterView, Acer AI Zone, Microsoft Copilot in Windows, and

more. The Acer Swift Go 14 can help you with your official work in so many ways. If you are in a noisy and busy

environment and have an e-meeting scheduled, this laptop has the solution. It features PurifiedView and PurifiedVoice that can help in providing better picture quality with noise cancellation. Furthermore, there is an Acer LiveArt that can put some background while you are in the meeting so that other people can't see your busy background.

Samsung Galaxy M15 5G & F15 5G launching soon

Samsung has recently updated its Galaxy A series by introducing the Samsung Galaxy A15 5G and Galaxy A25 5G smartphone models. Additionally, the company recently announced price reductions for the Galaxy M14 5G and Galaxy F14 5G devices, suggesting that their successors may be unveiled in the near future.

Google Pixel 8 series to have 'Circle to Search'

The Google Pixel 9 Pro has taken the internet by storm. No no, don't get too excited it hasn't dropped in the market yet. But its renders and leaks have surfaced online. There's a lot of time before the Google Pixel 9 comes out as Google usually launches the Pixel smartphones during the second half of the year.

Google Pixel 9 renders reveal an interesting upgrade

We recently came across the 8K renders of the Google Pixel 9 Pro that revealed a changed design and gave a sneak peek into the camera module. However, today, I woke up to 5K renders of the vanilla variant, the Pixel 9. Google is expected to launch the Pixel 9 series in the second half of this year, as usual. It's a long way till we

see these smartphones coming to life. But, these renders of the Pixel 9 give us some hints at the design and a change in the camera module.

The boxy and flat design seems to be a new trend now. First, iQOO switched to it with the iQOO 12, then Samsung with the Galaxy S24 Ultra, and now the Google Pixel 9 series

is rumoured to have a flat and boxy design. The Google Pixel 9 has been seen in Blue colour in the renders. It will reportedly have a flat-screen and a punch-hole cutout for the selfie camera. Furthermore, the SIM tray, the speaker, and a USB-C port have been rumoured to be placed at the bottom.
