

image processing of Snapdragon 8 Gen 3 paired with up to 24GB RAM and 1TB storage. A few other notable highlights of the phone include 50W wireless charging, a 5400mAh battery and stereo speakers.

Google Pixel 8 Pro and Pixel 7 Pro

Pixel phones this year have more than their fair share of shortcomings but Pro models (Review) do

offer a great 5x optical zoom experience. We'd say the Telephoto camera is the main reason why you should consider the Pro variants over the regular Pixel 8 and Pixel 7. Both of these phones are equipped with a 48MP Telephoto sensor stabilized by OIS. Another notable highlight of these phones is their vibrant LTPO OLED displays.

Sony Xperia 1 V

Sony Xperia 1 V is the only phone that offers continuous optical zoom between the range of 3.5 to 5.2x. The phone has a moving lens assembly and comes with several innovative camera features for still photography, portraits and for capturing videos. In fact, Sony also includes a microSD card slot which is an additional advantage for users who often move media from one device to another. There is also a dedicated shutter button and a 3.5mm Audio jack.

The Xperia 1 V is powered by a Snapdragon 8 Gen 2 processor and is equipped with a 120Hz 4K HDR OLED display.

Realme 12 Pro+ (upcoming)

Realme 12 Pro+ is all set to arrive in India in January 2024 and Realme has confirmed a periscope zoom camera, expectedly for a competitive mid-range

price. While the details regarding the phone are sparse, it is expected to be powered by Qualcomm Snapdragon 7S Gen 2 and sport a 64MP OmniVision OV64B periscope telephoto camera with 3x optical zoom capabilities.

Oppo Find X7 Ultra (upcoming)

Oppo first added a periscope zoom camera to its camera-centric Find series last year with Find X6, but the upcoming Oppo Find X7 Ultra might never make it to India, it deserves a mention because it includes not one but two Periscope cameras for 6x and 3x zoom. The Find X7 Ultra is rumoured to include four 50MP sensors. The 3x and 6x telephoto cameras on the phone use 50 MP IMX890 and 50 MP IMX858, respectively. The IMX890 is a relatively bigger sensor (1/1.5-inch) as compared to the IMX858 (1/ 2.51-inch). **d**
