

mSBC and even high-bitrate ones like AAC, ensuring more than optimal audio streaming performance. With Sonic Core Dynamics™, these TWS earbuds offer hardware-accelerated audio processing for crisp, clear sound.

Swift Charging, Long Play

Whether you are immersing yourself in your favorite music, indulging in gaming, or collaborating for work, the Z40 Ultra will keep you going without limitations. You won't have to stress about running out of power mid-commute, workout, or during phone calls.

Boasting a total of 100 hours of playtime, including the buds and the charging case, rest assured, your adventures will never be interrupted. With lightning-quick Type-C fast-charging, just 10 minutes of being on the charger adds 100 minutes of playtime, so you'll have enough juice to power you through your commute and beyond.

Seamlessly Elevating Communication

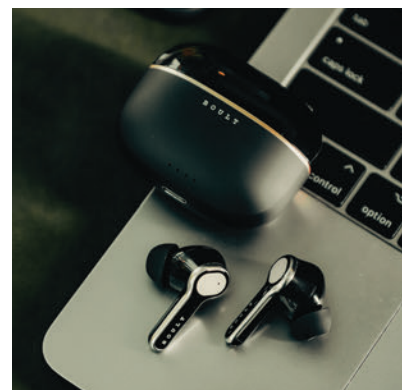

The Z40 Ultra's Prism Voice PLC™ technology uses AI-based signal boosting to ensure your voice comes through with precision and clarity.

The earbuds further feature a 4-Mic setup, complete with BOULT's proprietary Zen™ Mode tuning for Environmental Noise Cancellation (ENC).

The BOULT Z40 Ultra allows you to effortlessly manage music playback, answer calls, or interact with various features through intuitive gestures. With a simple tap of a button, you can seamlessly connect with voice assistants such as Google

Assistant and Siri, in order to effortlessly navigate your devices with the convenience of voice commands.

The BOULT Z40 Ultra offers a premium design with a metallic rim that adds a touch of elegance. Catering to different preferences, BOULT offers a choice between the sleek glossy Black variant, the Beige option with a rubber finish, and the brushed

Crafted for Style and Durability

Metallic variant. The LED indicator on the front gives a clear idea of the remaining battery, enhancing user experience and convenience. BOULT also includes extra ear tips in sizes S, M, and L, ensuring a comfortable and customized fit for everyone.

More Bang for Your Buck

The attractive and user-friendly design, coupled with its robust build quality, IPX5 water resistance, long-lasting battery, and fast charging support makes them a versatile companion for various activities, from workouts to daily commutes. Audio enthusiasts will appreciate the Z40 Ultra's advanced features, including Bluetooth 5.3 connectivity, ANC, and EQ modes.

Overall, the BOULT Z40 Ultra Bluetooth earbuds promise to deliver innovative, reliable, and accessible wearable technology, solidifying BOULT's position as a frontrunner in the competitive market landscape. You can buy BOULT Z40 Ultra online on Flipkart, Amazon, and www.boultaudio.com for just Rs. 1,999. ■

Audio Innovations

The first thing that stood out to us about the Z40 Ultra was the 32dB Active Noise Cancellation. Let's get this out of the way - it immersed us fully during testing, fully corroborating the company's claims. Be it music or calls, it cut down background noise quite effectively. Plus, another feature we were positively surprised to find was multipoint connectivity. Throughout our time with it, we went about bouncing audio feeds from both our test devices, and the earbuds stayed connected to both, with zero hassle.
