Vivo V30 series India launch date confirmed

Vivo is gearing up to launch the Vivo V30 series in India. The company has revealed that it will launch this lineup in the country next month. The V30 lineup includes two smartphone models: the Vivo V30 and Vivo V30 Pro. Vivo announced on X (formerly known as Twitter) that it will launch the Vivo V30 series in India on March 07th, 2024. The Vivo V30 series

micro-site is also live on the Vivo India website. The phone showcased on the micro-site is the Vivo V30 Pro model.

The company revealed that the Vivo V30 Pro handset will come with a ZEISS co-engineered camera system. The company also confirmed that the Vivo V30 series will feature a 120Hz 3D curved display.

The Vivo V30 and V30 Pro will be available in three colour options: Andaman Blue, Peacock Green, and Classic Black. <https://bit.ly/3lkgYVx>

Samsung Galaxy Fit3 launched in India

Samsung has brought back the Galaxy Fit series in India with the launch of Galaxy Fit3, an affordable fitness tracker with a 1.6-inch AMOLED display. This wearable will give users access to Samsung fitness and wellness tracking and could serve as a decent alternative to smartwatches from less reliable brands dominating the affordable smartphone segment. Samsung Galaxy Fit3 is available for Rs. 4,999 on Samsung.com and other retail stores. <https://bit.ly/4c3pea7>

Gurugram Drone Delivery

Remember how when we were kids we used to envision a sci-fi future with flying cars, drones, and robots? Turns out we are now living in the future. Technological advances that we had imagined back then are coming to life now, even in India. Just like drones delivering your food and other packages!

Gurugram has become one of the first cities in India to embrace drone delivery. Skye Air Mobility is behind bringing this system to Gurugram. <https://bit.ly/49U15Ri>

Xiaomi 14 Ultra: First official images teased

Xiaomi is gearing up to launch the Xiaomi 14 Ultra smartphone later this month. The company has officially released the images of the upcoming smartphone model. The official images reveal that the Xiaomi 14 Ultra handset features a design that can be said to be an improved version of the Xiaomi 13 Ultra, reports Gizmochina. The design retains familiar elements such as a large round camera module housing four cameras, accompanied by a dual-LED flash unit, and centred Leica branding. <https://bit.ly/3T30pIH>
