Galaxy AI to feature in more Samsung smartphones

During its recently held Unpacked event, Samsung showed us that it has fully and wholeheartedly embraced the AI route. Its focus and emphasis on AI was spoken at length during the event. Galaxy AI was also unveiled at the event which is

currently available on its most recent Samsung Galaxy S24 series. The AI features on these features are really cool. And now in a welcome move for Samsung users, the South Korea-based tech giant is

expanding Galaxy AI to older devices as well. The company will bring Galaxy AI to previous devices with a new OneUI 6.1 system update that will roll out by the end of March, as informed by the company. TM Roh, President and Head of Mobile Experience Business at Samsung Electronics said that Samsung aims to bring the Galaxy AI experience to over 100 million Galaxy users by the end of 2024. He said, "Our goal with Galaxy AI is not only to pioneer a new era of mobile AI but also to empower users by making AI more accessible." <https://bit.ly/3uTU6sS>

iQOO's Nipun Marya & Nothing's Carl Pei engage in a heated spat on X

iQOO has launched its latest mid-range smartphone, the iQOO Neo 9 Pro, which is expected to go big in the sub-40K mid-range segment. This is a performance-centric

phone powered by last year's flagship Snapdragon 8 Gen 2, paired with Q1 Computing Chip for an enhanced gaming experience. And it's drawing a lot of heat. We are not

questioning the thermals or even discussing the phone but are talking about an X (formerly Twitter) spat between iQOO's CEO Nipun Marya and Nothing's Co-Founder, Carl Pei. Tipster Mukul Sharma posted a promotional poster of the iQOO Neo 9 Pro on X. <https://bit.ly/3uM300p>

Mark Zuckerberg's take on Apple Vision Pro VS Meta Quest 3

Apple Vision Pro has been a big hit in the US market. But, it seems like Meta hasn't taken it well, and obviously, why would it? Meta has been ruling the AR VR market for quite a long time with its Meta Quest MR headsets. However, Apple's not-so-affordable MR headset wasn't been able to impress much the Meta CEO, Mark Zuckerberg. He tried the Vision Pro for the first time and posted his comparison on social media. Zuckerberg pointed out how Apple Vision Pro is way too expensive than Meta Quest, but still couldn't beat it in so many aspects. <https://bit.ly/3T5D8zV>

Google launches Gemini Business & Enterprise

Earlier this month, Google renamed its AI chatbot Bard as Gemini and also launched Gemini Advanced which provides access to the Ultra 1.0 AI model. Google also announced that Gemini will be coming to Google Workspace. Now, Google has finally announced Gemini for Workspace. Also, the tech giant has announced a new standalone experience to chat with Gemini, with enterprise-grade data protections. This experience uses 1.0 Ultra, and will be available for Gemini Business and Gemini Enterprise customers. <https://bit.ly/4bYuHPm>

Gemini within Gmail

Google recently introduced the Google One AI Premium plan, which gives users access to Gemini Advanced—a new experience that uses 1.0 Ultra, the company's largest and most capable AI model widely available today. Now, Google has announced that with the Google One AI Premium plan, you can get more creative and productive using Gemini in Gmail, Docs, Slides, Sheets and Meet. "We're bringing even more value to the Google One AI Premium plan with Gemini in Gmail, Docs, Slides, Sheets and Meet (formerly Duet AI). Starting today, you'll be able to access Gemini capabilities directly within the Google products you're already using. <https://bit.ly/3P4Tw2n>
