

## Copilot gets 2 new features

Microsoft has announced new features for Microsoft Copilot that will help users to edit AI-generated images. Along with the new features, the tech giant has also announced a design overhaul for Copilot. Moreover, Microsoft is adding a new carousel that will suggest prompts to showcase the power of Copilot. You can highlight an object to make it pop with enhanced colour, blur the background to emphasise your subject or apply unique effects like pixel art, all for free. <https://bit.ly/316Fn0b>

## Are Indian homes getting smarter?

Smart assistants have become a part of the daily lives of many people across the globe. In India as well, we have seen a rise in the number of people flocking towards the smart assistant trend. People have found their own comfort zone in a world that is fuelled by these digital assistants. This growth in the popularity of smart assistants in demand was showcased in the data released by Amazon on the sixth anniversary of their smart assistant, Amazon Alexa, in India. <https://bit.ly/3uHWIKF>

## Google unveils Gemini 1.5 AI

Google unveiled its most capable model 'Gemini 1.0 Ultra' earlier in February. Now, the tech giant has introduced its next generation AI model named 'Gemini 1.5'. According to the company, the Gemini 1.5 model delivers "dramatically enhanced performance." They added, "We're ready to introduce the next generation: Gemini 1.5. It shows dramatic improvements across a number of dimensions and 1.5 Pro achieves comparable quality to 1.0 Ultra, while using less compute," the tech giant announced in a blogpost on February 15th. <https://bit.ly/3DPXFHn>

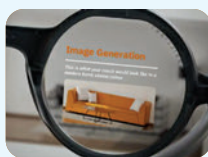

### India's own ChatGPT soon?

The AI model Hanooman could assume and will offer speech-to-text capabilities. Hanooman could give us an Indian alternative to ChatGPT that could even understand regional languages. <https://bit.ly/49mJ1tD>

### 100 million stronger!

Google has experienced a sudden surge in Google One subscribers, reaching 100 million followers. Gemini Advanced provides basic generative AI assistance and handles complex tasks. <https://bit.ly/350amU2>

### 'Ainak' the AI Assistant

We recently saw the launch of the world's first glasses powered by an integrated multimodal AI assistant called 'Frame'. It is a product by Singapore-based consumer electronics company Brilliant Labs. <https://bit.ly/3145p58>

**I hope consensus emerges and that is what really helps, in some sense, (with) the diffusion of this technology.**
