

Google Deepmind's new AI agent 'SIMA' will be your in-game teammate

Google DeepMind has introduced SIMA, an AI agent designed to develop gaming skills that align more closely with human gameplay instead of being too strong and doing its own thing. SIMA, which stands for Scalable, Instructable, Multiworld Agent, is still in the research stage. SIMA aims to eventually master playing any video game, including those with no linear path to end the game and open-world games.

OpenAI accidentally spills deets on GPT-4.5 Turbo model

Even the biggest of tech companies make small mistakes and well for us those mistakes become good news. No no, there's no need to read between the lines, I'll tell you what's going on. Just recently, OpenAI made a future blog public by mistake. The blog post spoke about the upcoming GPT-4.5 Turbo model. Even the biggest of tech companies make small mistakes and well for us those mistakes become good news. No no, there's no need to read between the lines, I'll tell you what's going on. OpenAI's GPT-5 will evolve with you, says Sam Altman

Artificial Intelligence is booming with each passing day, every day I come here to share some of the other developments in that space. And OpenAI has been leading that space with its ChatGPT. We now hear that the release of its next upgrade, OpenAI's GPT-5, could be right around the corner. Why do we say that? There's obviously a lot of buzz about this on the internet but it has been over a year now since GPT-4 was released and it only makes sense for GPT-5 to arrive now with its new upgrades. Even the main guy Sam Altman hinted at the arrival of GPT-5, he took to X (formerly Twitter) and said, "Patience, Jimmy. It would be worth the wait." This tweet has further added fuel to our speculations.
