

Elevated smartphone photography for the masses

In conversation with Realme Founder and CEO **Sky Li** about the company's latest entrant in the sub-₹20,000 price segment – the Realme Narzo 70 Pro

Dhriti Datta | dhriti@digit.in

Realme has launched its latest entrant in its popular Narzo series today. The Realme Narzo 70 Pro has been launched starting at ₹19,999 in India and it comes with a bunch of impressive features and specifications. The Realme Narzo 70 Pro houses a 6.67-inch AMOLED display with 2,000 nits of peak local brightness, a 50 MP Sony IMX890 camera, and a 5,000 mAh battery. The phone competes with like likes of the iQOO Z9 and Nothing Phone (2a) in the sub-₹25K price segment. I had the chance to speak with Realme Founder and CEO, Sky Li, about the latest launch and what makes the Realme Narzo 70 Pro special.

Digit: What are the realme NARZO series' three greatest strengths?

Sky Li, Realme: At realme, we take immense pride in our commitment to deliver state-of-the-art technologies and robust features, ensuring our customers get unparalleled value for their money.

The reception of the narzo series has been extraordinarily positive. The series has been widely acclaimed by tech enthusiasts and consumers, who have embraced its next-gen technology with open arms. Here are some key aspects that have resonated with our audience:

Sky Li
Founder and CEO, realme

Exceptional Performance: The narzo series stands out in its price range for delivering top-notch performance. With powerful processors and finely tuned software, these devices offer a smooth user experience, handling everything from multitasking to everyday tasks with ease.

Stunning Design: At realme, design aesthetics are paramount, and the narzo series is a testament to this. Its modern and striking designs have struck a chord with our vibrant user base of 16 million in India, allowing them to make a bold style statement. **Cutting-Edge Features:** The realme narzo series consistently brings innovative features to

the table, catering to the ever-changing needs of our customers. Be it advancements in camera technology, pioneering display improvements, or generous storage capacities, we aim to stay at the forefront of innovation.

Our unwavering dedication to equipping users with powerful smartphones, without stretching their budget, motivates us to continue pushing the boundaries of what's possible.

Digit: The realme NARZO 70 Pro sees a decline in third-party bloatware in the UI. What was the reason behind this decision? Will this be exclusive to the NARZO series or will other phones get an OTA update to address bloatware issues?

Sky Li, Realme: The reduction of third-party bloatware in the realme NARZO 70 Pro 5G UI is a result of our commitment to improving user experience. This decision was taken based on feedback from our users who desired a cleaner, more efficient user interface. By reducing pre-installed third-party apps by 65%, we've ensured that the realme NARZO 70 Pro 5G offers a powerful and user-friendly experience, running on realme UI 5.0, based on Android 14.

This gives our users a pure software experience, free from unnecessary clutter. Our aim is to provide our users with a seamless and enjoyable smartphone experience, and we believe that reducing third-party bloatware is a significant step in achieving this goal. Please stay tuned for further updates.

Digit: The realme NARZO 70 Pro focuses a lot on low-light photography and design. Can you tell us how realme has worked with the sensor and ISP to ensure good-quality low-light photography?

Sky Li, Realme: The smartphone features a high-quality sensor with bigger pixels and a wider aperture. This allows more light to penetrate the lens, greatly improving the quality of images taken in low-light circumstances. The sensor also employs pixel binning technology,
