Samsung prepares to challenge Apple's Vision Pro

Apple launched its XR headset—the Vision Pro—earlier this year. There is speculation that Samsung could unveil its first XR headset before the end of this year. Now, in the latest development, Samsung has submitted a patent

application hinting at the development of a VR headset. The patent application, submitted to the Korean Intellectual Property Office, describes the technology as “Communication methods and apparatus utilising avatars in virtual

space,” reports MySmartPrice. As outlined in the document, the headset is designed to project virtual avatars to users by leveraging multiple sensors to gather data from their surroundings. <https://bit.ly/3WfSpBf>

Apple cuts Vision Pro production

Apple put its “too cool to be true” Vision Pro out on sale in February 2024. The product went viral in the true sense. It was all the rage on Instagram, everyone was flexing and talking about it. But I guess those were the only 5 seconds of fame that the Vision Pro got. Media reports suggest that Apple did not get the response that it was anticipating with the product. It did blow over social media, but the demand wasn't that much. According to Apple analyst Ming-Chi Kuo, Apple had decided to cut down on orders for the device even before the company launched it outside the States. <https://bit.ly/3WlfcSx>

Lenovo IdeaPad Pro 5i launched

Are you a creator? And are you looking to buy a new laptop? You can consider this one. Lenovo has launched a new laptop, called the IdeaPad Pro 5i. This laptop is specifically focused on the growing creator market. This is the first device in India that will feature a Core Ultra 9 processor. Speaking about the laptop, the IdeaPad Pro 5i is powered by Intel's Core Ultra 9 185H processor. This will help creators with intensive tasks like high-resolution video editing and 3D rendering. It also leverages AI to make work more efficient. <https://bit.ly/4bikKLm>

Samsung Galaxy S24 FE to launch end of 2024

The year started with Samsung unveiling its flagship Galaxy S24 series. The series included three high-end smartphones: Galaxy S24, Galaxy S24+, and Galaxy S24 Ultra. Post that, people started waiting for the Fan Edition series; we are talking about the Samsung Galaxy S24 FE. A new report now claims that the launch of the affordable variant of the S24 series will have to wait for some time. According to previous rumours, it was expected that the Samsung Galaxy S24 FE would launch by the summer of 2024. However, that doesn't seem to be the case now as the launch has been pushed ahead. <https://bit.ly/4bhqOnr>
