

Nothing Phone (1) receives OS 2.5.5 update

Nothing is rolling out the OS 2.5.5 update to the Nothing Phone (1) smartphone. From integrating ChatGPT to the RAM Booster feature, this update is set to elevate your smartphone experience. The update brings new ChatGPT widgets for fast and easy access from the home screen. The update also brings a RAM Booster feature and a new gesture option in Nothing X to start a voice conversation with ChatGPT for Nothing Ear and Nothing Ear (a). <https://bit.ly/3xQdU1d>

Gigabyte brings AI to its latest monitor

Gigabyte just rolled out their latest gaming monitor, the AORUS CO49DQ, in India. It's a 49-inch beast with a curved QD-OLED screen and it's going to be available from the 31st of April for ₹129,000. You can grab one online or swing by any authorized GIGABYTE dealership. It is a 49-inch ultrawide QD-OLED monitor. It packs a 5120 x 1440p resolution, covers 99% of the DCI-P3 color space, and kicks out refresh rates up to 144Hz. <https://bit.ly/3y622Z0>

Qualcomm announces Snapdragon X Plus SoC

They are looking to make a serious change in their approach to the SoC market, riding the AI wave

—By Ayushi Jain

“Qualcomm has expanded its Snapdragon X Series platform portfolio with Snapdragon X Plus. The company claims that the new Snapdragon X Plus platform will deliver “exceptional performance, long battery life, and industry-leading on-device AI capabilities.”

Snapdragon X Plus features the state-of-the-art Qualcomm Oryon CPU, a custom-integrated processor that is said to deliver up to 37% faster CPU performance compared to competitors, while consuming up to 54% less power. “This remarkable advancement in CPU performance sets a new standard in mobile computing, enabling users to accomplish more with greater efficiency,” the company said in a press release.

Snapdragon X Plus is built to handle the demands of on-device AI-driven applications. It's equipped with the Qualcomm Hexagon NPU, which can

handle up to 45 TOPS, making it the world's fastest NPU for laptops.

For the launch of the Snapdragon X Plus, the company has introduced new AI-optimised applications and features running on the 45 TOPS NPU, including:

- **Code generation in Visual Studio Code from Codegen:** This will assist programmers by generating fresh code instantly with on-device generative AI.

- **Music generation in Audacity using Riffusion on-device AI:** To generate new music from prompts or pre-existing music.
- **Live captions in OBS Studio:** To provide automatic translation of 100 spoken languages into live captions in 100 languages using Whisper on-device, in real-time during livestreams.”
