

Adobe Express app with Firefly AI now open

Adobe has announced that the all-new Adobe Express mobile app is now generally available to all users. This app offers features powered by Adobe Firefly generative AI. According to the company, Adobe Express is the all-in-one AI content creation app that makes it fast and easy for anyone to ideate, design and share standout social media posts, videos, flyers, logos and more. <https://bit.ly/3JGwtYv>

Microsoft introduces VASA-1

As artificial intelligence (AI) continues to advance at an astonishing pace, it's transforming various aspects of our lives in remarkable ways. One of the latest breakthroughs in AI technology comes from Microsoft, with the unveiling of VASA-1. Imagine being able to bring a still photograph to life, not just with movement, but with realistic facial expressions and speech. That's precisely what VASA-1 promises to deliver. With just a simple photo and an audio clip, this innovative AI system can generate captivating videos featuring lifelike talking faces. <https://bit.ly/3Utaeue>

Google's Gemini AI assistant could soon support third-party music apps

Tired of Gemini's limitations? Good news might be on the horizon! Google's Gemini AI assistant is reportedly gearing up to support third-party music apps like Spotify. Imagine being able to ask Gemini to play your favourite tunes from Spotify or Apple Music. This could be a game-changer for users frustrated by Gemini's current inability to identify songs or play music from popular streaming services. <https://bit.ly/3xXT5Bj>

Google Chrome could soon suggest AI-powered passwords

Google Chrome might soon become even smarter. Imagine a world where it not only remembers your favourite sites but also suggests passwords crafted by artificial intelligence (AI) to keep your accounts secure. <https://bit.ly/3QMHaNh>

AI vs Human is getting real now! US hosted F-16 dogfight between the two

We knew that "AI vs Human" has been a matter of concern ever since AI started getting more advanced. The US Air Force has revealed that it conducted a dogfight between an AI and a human pilot. <https://bit.ly/3JM79A9>
