

Vivo X200 could feature Mediatek's next most powerful smartphone chip

Vivo is on a roll with its smartphone launches. After the launch of the Vivo X100 Ultra, X100s, and X100s Pro in China, the company is all set to launch the Vivo X200. But as is the case always, and I always say, the leaks and rumours make their way even before the actual phone. A well-known tipster, Smart Pikachu has shared some details about the upcoming Vivo X200 via a Weibo post. The most exciting thing that he shared is that the smartphone can pack the yet-to-be-launched MediaTek Dimensity 9400 processor. This can be MediaTek's next flagship processor.

Oppo F27 Pro with leather back could launch next month

A new report has emerged suggesting that Oppo is preparing to launch the Oppo F27 Pro smartphone in India. The Oppo F27 Pro is expected to be the country's first IP69-rated phone, and could feature a leather-back design. According to tipster Ishan Agarwal, via 91mobiles, the Oppo F27 Pro will likely feature an

IP69 rating, which is the highest level of protection against water, dust, and debris. This would make the Oppo F27 Pro the first IP69-rated phone in India. Notably, flagship models like the Samsung Galaxy S24 and Apple iPhone 15 only have an IP68 rating, which has been the highest standard.

Flagship phones OnePlus 13, Realme GT 6 Pro, and others could pack significantly larger batteries

If we are buying a new smartphone, we demand a lot from it. We need a good processor, good camera, software and whatnot. And among this long list of demands, we also want them to have a good battery backup. A recent report suggests that

OnePlus 13, Realme GT 6 Pro, and OPPO Find X8 can come with massive 6,000mAh batteries. Leakster Smart Pikachu took to Weibo to share that these smartphones will carry a 6,000mAh battery.
