CHARTING THE COURSE OF AI INNOVATIONS FROM AROUND THE WORLD

[Must Read]

AI-powered Yoga Mat developed by Indian startup

In the ever-evolving landscape of fitness technology, an Indian startup is making waves with an innovation that seamlessly blends ancient practices with artificial intelligence. Introducing YogiFi, the AI-powered yoga mat poised to revolutionise the way we approach yoga.

Wellnesys Technologies Private Ltd, a startup incubated at the Indian Institute of Technology (IIT) Mandi, has developed a yoga mat called 'YogiFi'. This mat leverages advanced artificial intelligence (AI) and computer vision (CV) technologies to provide a personalised yoga coaching experience, reports BizzBuss. The YogiFi mat was recently showcased to several Union Ministers, including External Affairs Minister S. Jaishankar, Railways, I&B and IT Minister Ashwini Vaishnaw, and Finance Minister Narendra Sitharaman, on behalf of the Ministry of Science and Technology."

Humans might develop emotional attachment to AI

With the onset of AI, how we interact with AI is also going to change substantially. Toby Walsh has predicted that in the future AI will become more intimate and will not remain like something that we use today. In a conversation with Tech Today, Walsh said, "AI is going to be the operating system of all of our devices. Everything... our front doorbells, our lights... our cars, our toasters. Everything is being connected to the Internet." Now, this interconnectedness will be combined with AI. It will be driven by AI assistants that can converse with us find out our needs and offer personalised responses.

Amazon Alexa reportedly getting paid AI features

According to reports, Amazon is going to give Alexa a significant change so that it can become a part of the competition again. Amazon has decided to integrate conversational generative AI, as per a Reuters report. Internally, the guys at Amazon are calling this attempt, the project "Banyan". If rumours are to be believed, Amazon will market it as "Remarkable Alexa." Now, from what we have seen so far, this is not just a technological upgrade but also an attempt to address the long-standing unprofitability of Amazon's Alexa business.
