Marshall brings their Major V headphones to India

Marshall, adding to their line of personal audio products, has launched the Marshall Major V in India, a couple of months after its overseas launch which happened in April this year. This pair of headphones is the successor to the Marshall Major IV, which launched around four years ago.

These headphones are slightly heavier than their predecessors, coming in at 186 gm compared to the 165 gm of the Marshall Major IV. The increased weight could be attributed to the increased battery life on these headphones compared to their predecessors. On paper, their driver sensitivity is higher than the Major IV, despite the same driver size.

The Marshall Major V are rated to have a driver sensitivity of 106 dB SPL compared to the 99 dB SPL of the Major IV. One of the biggest increments is the inclusion of Bluetooth LE audio in these headphones.

Dyson OnTrac headphones with changeable caps and cushions unveiled

Dyson, popular for its innovative home and hair appliances, has just unveiled its first high-fidelity, audio-only headphones called Dyson OnTrac headphones. One of the main highlights of the headphones is that you can change its caps and cushions. With over 2,000 customisable colour combinations for outer caps and ear cushions, each ear cushion is created from ultra-soft microfiber and high-grade foam for comfort and acoustic seal.

"With over 30 years of experience in aeroacoustics, we've mastered sound physics. By reducing noise through in-house anechoic chambers and expert engineers, we've applied and further expanded our audio knowledge to develop the Dyson OnTrac headphones," Jake Dyson, Chief Engineer, said. The Dyson OnTrac features a custom Active Noise Cancellation (ANC) algorithm which uses 8 microphones, sampling external sound 384,000 times a second. This combines with superior materials and carefully designed internal geometry to cancel up to 40dB of unwanted noise, as per the company. <https://bit.ly/DsonHP>

Boat's next smart ring will only cost ₹2,999

Samsung just launched its Galaxy Ring last week with a price tag of \$399 (approx. ₹33,000). Now, Boat is gearing up to launch its new smart ring named 'Smart Ring Active' which will cost even less than one-fourth the cost of the Galaxy Ring.

As someone who's been impressed by Boat's commitment to quality and value in audio products, we couldn't be more intrigued to see what the company has in store for us. Boat's upcoming smart ring promises to blend style with functionality, offering users a convenient way to stay connected and track their health without breaking the bank. With smart rings gaining popularity worldwide, the Smart Ring Active aims to make technology more accessible to Indian consumers. <https://bit.ly/GRingO>
