

Nike Air Max Dn

Comfort in every air pocket

N

ike's Air Max line has been a hugely popular sneaker ever since the late 1980s.

The Nike Air Max range, which is mostly spearheaded by popular shoes like the Air Max 90 or the Air Max 1, is usually known for its design, comfort, and durability. With the latest Nike Air Max sneaker, Nike has claimed to push the boundary even further, offering advanced tech, along with the staple durability and comfort that the Air Max range is anyways known for.

Being a techie who spends half his money on shoes, I was very interested in finding out what the new Nike Air Max Dn is all about. Does the tech that is being promoted actually work or is it all too gimmicky for someone who only wants a comfortable shoe. In this

review, I will delve into exactly that and tell you if the new Nike Air Max Dn is worth the ₹13,995 price tag.

Design

Starting with the design, the Nike Air Max Dn looks quite different. We get a sport-shoe like silhouette but with a twist. With this shoe, Nike is going back to its "Air Pocket" design for the midsole, which is quite an iconic design that started back in the 1990s with the Nike Tube Air. The midsole is also very angular. There are a lot of curves and lines that shape up this mid-sole, along with a small Nike swoosh logo in the middle part, which is made of a hard material.

On the heel as well, we see a similar material with the "Air Max Dn" branding. With the upper, Nike

has used high quality materials like a breathable mesh with a synthetic overlay to keep the structure intact. Nike has created this in collaboration with some of the top athletes of the world. The toe also has a small Nike logo, which is a nice detail.

Coming to my favourite part of the design, the air pockets on the midsole heel. There are four air pockets right below the heel also known as the "Air Max Unit". These air pockets are made from resilient foam that helps with cushioning and support. Here also, we get the "Air Max Dn" branding on the second air pocket. There is also a pattern that surrounds the air pockets on this shoe, which just adds to the look and doesn't have any functionality as such.

Comfort and Performance

Now that we have talked about how the shoe looks, it is time to take a look at how it performs. The Nike Air Max Dn, like any other Air Max sneaker is extremely comfortable. The shoe fits super snug on the feet and the mate-
