Google improves 'Help me write' in Gmail

Google is enhancing its Gmail experience with new updates to the 'Help me write' feature, powered by Gemini. Building on the success of previous innovations like email summarisation, Google is now rolling out additional tools to streamline the email drafting process.

"Building upon our popular Help Me Write feature in Gmail and the recent launch of the summarisation feature in the Gmail mobile app, we're excited to introduce two new Gemini in Gmail updates to help you draft emails even faster," Google announced in a Workspace Updates blog post. <https://bit.ly/3WXxAp>

Toyota confirms data breach

Toyota has confirmed a data breach following the exposure of 240GB of sensitive information, leaked by a threat actor on a hacking forum. The leaked archive, shared by the group ZeroSeven-Group, contains extensive details about Toyota employees and customers, including contracts and financial data. In a statement to BleepingComputer, Toyota acknowledged the situation and said, "We are aware of the situation. The issue is limited in scope and is not a system-wide issue."
