WhatsApp feature can soon auto-block messages

WhatsApp is one of the most used messaging platforms out there. The company, which is owned by Meta, does know this and keeps on adding new features every now

and then to keep the users glued. Now, we might get to see some new and useful features coming on WhatsApp soon. One such feature might be able to block messages from unknown

accounts automatically. This new feature aims to enhance user security and privacy. It will let users automatically block messages from unknown accounts. <https://bit.ly/4dDbIj7>

■ DIGITAL PAYMENTS

Swiggy UPI launched in India

Swiggy, one of India's leading on-demand convenience platforms, has introduced Swiggy UPI, a new feature aimed at enhancing the in-app payment experience for its users. With this launch, Swiggy integrates the National Payments Corporation of India's (NPCI) UPI Plug-in solution, allowing users to make UPI transactions seamlessly without leaving the app. This innovation significantly reduces the payment process, cutting down the steps from five to just one. Swiggy UPI is powered by Juspay's HyperUPI Plugin, which streamlines the payment experience by removing the need for redirection to external UPI apps. As UPI transactions continue to soar in India—reaching approximately 131 billion transactions by April 2024. <https://bit.ly/3MhTT7V>

Lucknow professor scammed of Rs 2.81 cr by fraudsters

In a shocking incident from Lucknow, Dr

Ruchika Tandon, an associate professor at SGPGIMS, has fallen victim to a cyber scam, losing a staggering Rs 2.81 crore.

This elaborate fraud unfolded over seven days, leaving the victim in a state of fear and confusion.

The scam began when Dr Tandon received a call from individuals pretending to be officials from the Telecom Regulatory Authority of India (TRAI). The scammers accused her of illegal activities and threatened her with arrest.

To make their scam seem more believable, they also impersonated officers from the Central Bureau of Investigation (CBI). <https://bit.ly/3MICOF4>

Premier League to ditch VAR

The English Premier League (EPL) is just around the corner and

this time, it is going to change its tech language. After many controversies, EPL will change how it uses its video-assistant referee (VAR) systems. For the 2024-2025 season, it is using a new system called "Dragon". It is designed by Genius Sports and will use dozens of iPhones to assist in making offside calls. The reason behind this change can be the fact that the present VAR system has been criticised a lot for its inaccuracies and delays. <https://bit.ly/3yU2MS4>
