

down by bloatware, dark patterns, and persistent ads. The promotions widget in the App Vault is particularly annoying, but it can be removed.

CAMERA

The POCO M6 Plus 5G features a straightforward camera setup with a 108 MP Samsung ISOCELL HM6 primary camera and a 2 MP macro lens. While it doesn't have OIS, it does offer HDR, Auto-Night Mode, and 3x in-sensor zoom.

However, the 108 MP camera struggles with dynamic range, resulting in crushed shadows and overexposed highlights. Portrait mode photos tend

to look overly smooth with unnatural skin tones. While the detail is decent for the price, the camera performance is average at best, with noticeable noise in low-light and moderate daylight.

For a better camera experience on a budget, the Realme C65 is a solid alternative, offering better exposure and colour accuracy.

BATTERY

On the plus side, the POCO M6 Plus excels in battery life. The 5,030 mAh battery delivers an impressive screen-on time of 9-10 hours with heavy use. In our 4K video loop test, the phone lasted 992 minutes, or just over 16.5

hours—beating both the Realme C65 and iQOO Z9X in endurance.

Charging speeds, however, leave much to be desired. The 33W charger takes about 75 minutes to fully charge the battery, whereas the iQOO Z9X offers faster 44W charging.

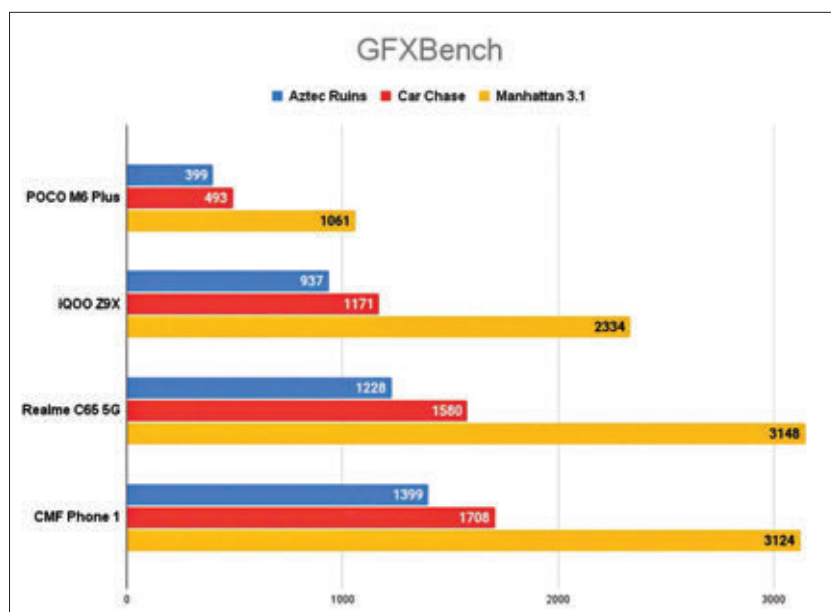

VERDICT

The POCO M6 Plus aims to bring 5G connectivity to an affordable price point. It does that while bringing excellent battery life and a good-looking design to the table. However, it falls short in several areas.

The bulky design, lacklustre display, and average camera performance make it less appealing for users looking to purchase a well-balanced budget 5G phone.

For gamers, the iQOO Z9X and the CMF Phone 1 offer better performance, while the Realme C65 provides a more balanced experience with superior camera quality.
