

OnePlus Pad 2

Snapdragon 8 Gen 3 Power at an Unbeatable Price

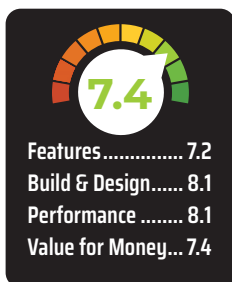

₹39,999

Did you know you can get a Snapdragon Gen 3 device for just ₹40,000? Today, we're diving into the OnePlus Pad 2. With pricing starting at ₹39,999 for the 8 GB + 128 GB variant and ₹42,999 for the 12 GB + 256 GB version, this tablet stands out as the most affordable Snapdragon 8 Gen 3 device available in India. Let's see if it's worth your money.

BUILD AND DESIGN

The OnePlus Pad 2 boasts a sleek aluminum design, reminiscent of classic OnePlus aesthetics. At 586 grams, it's slightly larger and heavier than its predecessor but still lighter than competitors like the Samsung Galaxy Tab S9 FE+ and Apple iPad Air.

The matte aluminum back is fingerprint-resistant, and the integrated camera module with a metallic ring adds a touch of elegance. The OnePlus logo reinforces the tablet's landscape orientation.

FRONT AND REAR

CAMERA

On the front, the Pad 2 features a selfie camera for facial recognition, which is your sole biometric option. It's smooth and reliable, though a fingerprint sensor would have been a nice addition. The camera setup includes a 13MP rear camera and an 8MP front camera. The rear camera's performance is subpar, while the front camera is adequate for selfies. The tablet supports 4K30FPS video, which is decent for occasional use but not a standout feature.

DISPLAY

The 12.1-inch 3K IPS LCD display with a 7:5 aspect ratio is a highlight of the Pad 2. It supports HDR and offers a variable refresh rate of up to 144Hz, making it one of the smoothest displays in its category. Although the screen can reach up to 900 nits in bright sunlight, we measured a solid 560 nits under cloudy conditions. With brightness set to maximum and auto brightness turned off, it reaches around 600 nits, which is competitive for this segment. The display provides excellent color accuracy and good viewing angles.

PERFORMANCE

Powered by the Snapdragon 8 Gen 3 processor, the OnePlus Pad 2 delivers top-notch performance. However, the performance does fall short of other devices featuring Snapdragon 8 Gen 3 processors due to throttling, as can be seen in the AnTuTu and PCMark benchmarks. You can choose between 8GB RAM with 128GB storage or 12GB RAM with 256GB UFS 3.1 storage. While UFS 4.0 would have been ideal, the performance remains strong, handling multitasking and gaming efficiently.

Games like Genshin Impact run smoothly, however, like we mentioned above, the CPU throttles under heavy use.

BATTERY LIFE

Equipped with a 9510mAh battery, the Pad 2 offers a full day of use for casual users. Heavy users may need to recharge by midday, with the PCMark battery test showing 7 hours of life. The 67W fast charger is a standout feature, allowing the battery to charge fully in under 80 minutes.

AUDIO

The OnePlus Pad 2 features a 6-speaker setup with Omni Bearing Audio technology that adjusts sound based on the tablet's orientation. This delivers a rich stereo experience for movies and music. The absence of a headphone jack is notable, but
