

case with ANC turned on, you shouldn't need to charge these earbuds for at least 3-5 days. The case charges fully in about 2 hours and supports fast charging, providing 2 hours of playback

(combined case and earbuds) with just 10 minutes of charging.

VERDICT

The POCO Buds X1 offers a compel-

ling package in the budget true wireless earbuds segment, with features such as Active Noise Cancellation at an attractive price of ₹1,699. Despite minor drawbacks like finicky touch controls and a bass-heavy sound profile that may not suit all users, the POCO Buds X1 delivers excellent value. The lightweight design, effective ANC, and impressive battery life make these earbuds a strong contender in their price range. So, the POCO Buds X1 are a steal for the price, though the bass-heavy sound might not be everyone's cup of tea.
