

\$5 billion

India's refurbished smartphone market is booming, with an estimated value of \$5 billion. Currently, the organised refurbished market comprises only 20-25% of this figure. The overall market is expected to double to \$10 billion by 2030, indicating a bright future for the pre-owned smartphone industry in India.

iPhone #1

In India, demand for refurbished iPhones is driving growth, followed by consumers seeking OnePlus and Samsung smartphones.

Indian boom

Apple captured 49% of the global refurbished smartphone market in 2022 followed by Samsung at 26%. Overall, India led the market with 19% year-on-year growth, according to Counterpoint Research's 2023 report.

E-waste crisis

Between 2010-2022, India saw the highest 163% growth globally in generating e-waste from screens, computers, and other IT equipment, according to a United Nations Trade and Development report.

THE GOOD, BAD & THE UGLY

of India's refurbished tech gadget landscape

3rd largest in the entire world

India is currently the 3rd largest producer of e-waste in the world, generating about 3.2 million tons annually, expected to rise to 5 million tons by 2030. A study by ASSOCHAM found that computer equipment accounts for almost 70% of e-waste in India. About one-fifth of this waste comes from Maharashtra alone, but only about 47,810 tons are recycled per year in the state. The other major contributors are Tamil Nadu (13%), Uttar Pradesh (10.1%), West Bengal (9.8%), Delhi (9.5%), Karnataka (8.9%), Gujarat (8.8%) and Madhya Pradesh (7.6%), according to the report.
