

# Tata Curvv Coupe SUV and Curvv.ev

All new design, features and engine options explained in one place

**Yetnesh Dubey** | yetnesh@digit.in

**T**here's hardly any automotive company in the Indian market as reactive as Tata Motors. The term 'reactive' can be used in both a positive and a negative sense. Tata's haste in launching new cars often leads to overcomplicating its product variants. Additionally, the brand's after-sales service is still in need of a complete overhaul.

But putting that aside, Tata Motors is doing one thing very right—it's making aspirational cars that people are eager to get their hands on. No one moves faster than Tata Motors when it comes to innovation. The local brand was among the first to bring a new segment to the mass market—the SUV coupe—with the introduction of the Tata Curvv.

The Curvv is the first SUV coupe in Tata Motors' lineup and the second mass-market SUV coupe in the Indian auto market. Citroën stole some of Tata's thunder by launching its SUV coupe, the Basalt, just before the Curvv and pricing it very competitively with an introductory price of ₹7.99 lakh.

However, as we'll see now, the Tata Curvv is a different beast altogether.

## New design language

The front fascia is similar to Tata Safari/Harrier and Nexon but still manages to look distinct. The rear of the vehicle is equally impressive with a full-width LED light bar as well. Inside, the CURVV boasts a minimalist, button-free cockpit dominated by digital displays, which I don't like and from a safety standpoint are also not good. The steering will remind you of the Tata Safari and also the Tata Punch.ev for that matter. The cabin is spacious but doesn't offer enough headroom.

Additionally, Tata's chief design head, Martin, revealed that Tata CURVV's design is very 'human-centric.' While this encompasses a broad range
