

ASUS reveals AI-powered Copilot+ Zenbook and VivoBook laptops

At IFA 2024, ASUS showcased its latest innovations in AI-powered computing, unveiling a new lineup of Copilot+ PCs that emphasise the company's "Ubiquitous AI. Incredible Possibilities" vision. These devices, powered by the latest Intel Core Ultra processors (Series 2), promise to deliver exceptional performance, style, and an AI-driven user experience tailored for both professional and everyday use. The spotlight at ASUS's presentation fell on the new Zenbook S 14 and Zenbook S 16, ultra-slim laptops that merge cutting-edge technology with elegant design. These models feature premium Ceraluminum chassis, which offer a unique blend of ceramic and aluminium for enhanced durability and aesthetics.

Acer unveils gaming lineup with gaming handheld, laptops, PC and monitors

At IFA 2024, Acer didn't just present new gaming products; it unveiled a vision for the future of gaming. From groundbreaking handhelds to blisteringly fast monitors, powerful gaming desktops to speedy gaming laptops, Acer's latest lineup reflects a relentless pursuit of innovation that speaks directly to the heart of the gaming community. Leading the charge is the Nitro Blaze 7, Acer's first foray into the handheld gaming space, setting a bold new standard for portable gaming performance. One of the most anticipated announcements was Acer's debut in the handheld gaming market with the Nitro Blaze 7. This compact device is designed to deliver high-performance gaming on the go, featuring an AMD Ryzen 8040 Series processor paired with AMD Radeon 780M graphics. With a 7-inch Full HD IPS display that boasts a 144 Hz refresh rate, the Nitro Blaze 7 offers smooth and responsive gameplay that's perfect for portable use. Acer's new Game Space app further enhances the experience by integrating games from multiple platforms. <https://bit.ly/4dyp9uF>
