## Vivo X90 Pro

Vivo's partnership with German camera maker Zeiss takes another step forward with the Vivo X90 Pro. Apart from offering one of the best camera setups in the Android space, the Vivo-Zeiss partnership also spills over to the display of the Vivo X90 Pro. This time around, we get a "Zeiss Natural Colour" colour profile on the display, which is calibrated by Zeiss. Given that this is Vivo's big bet on camera this year, we also get a superior camera experience with the 50MP 1-inch type Sony IMX989 sensor. We also get a 50-megapixel telephoto lens, and a 12-megapixel ultra wide angle shooter.

## Apple iPhone 15 Pro Max

The Apple iPhone 15 Pro Max is Apple's top-spec device this year. The

## Google Pixel 9 Pro

The Google Pixel 9 Pro stands out with its advanced camera system, featuring a 48MP primary sensor, a 10.5MP ultra-wide

lens, and a 10.8MP telephoto lens with 5x optical zoom. This setup ensures excellent photo quality with good exposure, fast and accurate autofocus, and effective video stabilization across various lighting conditions. The device excels in capturing detailed long-range shots and offers HDR imaging by default for enhanced contrast and colour.

## Xiaomi 13 Pro

So the Xiaomi 13 Pro is the Chinese maker's answer to iQOO, Samsung, and OnePlus in

2023 (with Vivo coming fast at it with the Vivo X90 series). The first Leica-branded camera smartphone from Xiaomi in India brings the company's newly-established camera chops to our shores, along with the high-level performance that you'd expect from a flagship Android. This is also one of the first smartphones to come with a 1-inch type camera sensor.

smartphone comes with an all-new Apple A17 Pro chipset, paired with an improved triple rear camera setup with an improved 48-megapixel primary shooter, a 12-megapixel ultra wide angle lens, and a 12-megapixel telephoto lens. This time around, for the first time, we are getting the 5X optical zoom on an iPhone, which itself is enough to put the smartphone in the front when it comes to cameras. Add to that, the ability to record on a drive using USB type-C and the iPhone 15 Pro Max makes for one of the most complete camera smartphone in the market. Although we have seen the launch of the iPhone 16 series of phones which have improved on the camera of the iPhone 15 series, this phone still stands strong!

## Samsung Galaxy S24 Ultra 5G

The Samsung Galaxy S24 Ultra 5G boasts an impressive camera system designed for photography enthusiasts. It features a 200MP main camera for ultra-high resolution shots, a 12MP ultra-wide lens for expansive landscapes, and a 50MP telephoto lens with 5x optical zoom for detailed close-ups. Additionally, it includes a 10MP telephoto camera with 3x optical zoom. Enhanced by AI, the camera excels in low-light conditions and offers advanced features like Nightography and Pro Mode for professional-grade photos. The front-facing 12MP camera ensures stunning selfies, making the S24 Ultra a versatile tool for all your photography needs.
