## MSI Prestige 16 AI Evo BIM

The MSI Prestige 16 AI Evo features Intel's new Core Ultra 9 processor with NPU onboard and Intel Arc integrated

graphics, which supposedly provides up to 1.9 times better performance than Intel Iris Xe graphics. Its sleek magnesium-aluminum alloy chassis weighs approximately 1.5 kg, complemented by a 99.9 Wh battery that supports up to 140W charging. Available in several variants, including the AI Studio version with either the Core Ultra 9 185H or the Core Ultra 7 155H, and up to 32GB of RAM.

## ASUS Zenbook 14 OLED (UX3405)

Packing a 14-inch OLED touch display with a resolution of 2880×1800, 32GB of RAM, a 1TB SSD, an Intel Core Ultra 7 CPU, and weighing just 1.28

kg, the Asus Zenbook 14 OLED is a compact yet powerful laptop. This laptop promises a powerful AI computing experience for users who are looking for a light and portable device to use on the go.

## Acer Predator Triton Neo 16

The Acer Predator Triton Neo 16 is a high-performance gaming laptop designed for gamers, content creators, and fans of AI. It features a 16-inch WQXGA+ IPS display with a 165Hz refresh rate and NVIDIA G-SYNC technology for smooth visuals. Powered by Intel Core Ultra processors and NVIDIA GeForce RTX 4070 GPU, it handles demanding tasks with ease. The laptop includes 32GB LPDDR5X RAM and a 1TB PCIe NVMe SSD for fast performance and ample storage.

## ASUS ROG Zephyrus G14 GA402XZ-N2019WS

The ROG Zephyrus G14 is arguably the most powerful Artificial

intelligence laptop on this list. It's also fairly lightweight and compact. Those traits don't usually go together, but the Zephyrus 14 is just that, a compact powerhouse. It comes with a top-of-the-line Ryzen AI powered AMD Ryzen 9 7940HS processor which is paired with an NVIDIA RTX 4080 Laptop GPU. All of that in a 14-inch form factor! The 14-inch QHD+ display is no slouch either, with a resolution of 2560×1600 WQXGA and a 16:10 aspect ratio with a refresh rate of 165Hz. The laptop comes with 16GB of DDR5 RAM which can be expanded up to 32GB. This laptop is definitely pricey, but there's nothing this laptop can't do.

## HP Spectre x360 16-aa0664TX

The new HP Spectre x360 comes with two variants, 14-inch and 16-inch. The laptops are enhanced with AI technology, including a Neural Processing Unit or

NPU, and equipped with an NVIDIA GPU up to an RTX 4050. Powered by Intel Core Ultra 7 processors, the HP Spectre x360 is meant for power users on the go. Coming to the display, you get up to a 2.8K OLED screen with a 16:10 aspect ratio; ideal for creative workloads. The 16-inch model also boasts the world's largest haptic touchpad for a Windows-based 16-inch PC. The laptop is also quite a looker and in a room full of geeks or design enthusiasts, you are definitely gonna have to answer some intriguing questions.
