Apple MacBook Air 2023

The MacBook Air 15-inch is equipped with Apple's fantastic M3 chip, which includes an 8-core CPU and a 10-core GPU. It supports up to 24GB of unified memory. The laptop features a Liquid Retina display with a native resolution of 2560x1664p at 224 ppi. The laptop is without a doubt one of the best thin and light creator laptops in the market right now. It offers storage options of 256GB or 512GB, configurable up to 2TB. The MacBook Air also includes a MagSafe 3 charging port and two Thunderbolt/USB 4 ports.

Apple MacBook Pro 16"

The 16-inch MacBook Pro 16 is possibly the most powerful creator laptop in the market right now, and for good reason. The laptop comes equipped with Apple's newest M3 Max chip, which includes a 16-core CPU and a 40-core GPU. It supports up to 128GB of unified memory. The laptop features a Liquid Retina XDR display with a native resolution of 3456x2234 at 254 ppi. This is a fantastic, colour-accurate display, that will more than suffice for all of your creative and editing needs. It offers storage options of 1TB, configurable up to 8TB. All the space and RAM you'll ever need if you have the budget for it. The MacBook Pro 16-inch also includes a MagSafe 3 charging port and three Thunderbolt/USB 4 ports. We've already spoken about how well the M3 Max chip performs, even with the Apple MacBook Air.

Dell XPS 15

The Dell XPS 15 is another fantastic laptop for creators who need a top notch display. This laptop comes with a 15.6-inch OLED touch screen, offering a 3.5K resolution of 3456x2160. It is powered by a 13th Gen Intel Core i7-13700H processor with 14 cores. The laptop comes with an NVIDIA GeForce RTX 4050 GPU with 6GB GDDR6 VRAM as well, for heavier rendering workloads. It has 16GB DDR5 RAM, expandable to 32GB. The storage is a 1TB M.2 PCIe NVMe SSD.

Acer Aspire 5 A515-58GM

The Acer Aspire 5 has been our go-to all rounder budget laptop suggestion for some time now. For under 60K, you get a laptop that's capable of handling most tasks, from general everyday productivity to even light gaming. The latest iteration of the Acer Aspire 5 features a 15.6-inch Full HD display. It is powered by a 13th Gen Intel Core i5-1335U processor and an NVIDIA GeForce RTX 2050 GPU with 4GB GDDR6 VRAM. The laptop has 8GB DDR4 RAM which can be expanded.

ASUS Zenbook 14 OLED (UX3405)

You don't always have to break the bank when looking for a laptop with a great display. Enter the ASUS Zenbook 14 OLED. This is a 14-inch laptop powered by Intel's Core Ultra CPUs, ranging from a Core Ultra 5 125H to an Ultra 9 185H. So you have options with the latest processors in the market right now, for under INR 1 lakh. It features integrated Intel Arc Graphics, up to 32GB of RAM, and up to 1TB of storage.
