LG G4 OLED TV

This 65-inch LG TV features a 4K Ultra HD OLED display with a 120Hz native refresh rate, delivering vibrant colours and smooth motion. Powered by the α11 AI Processor 4K, it offers advanced AI upscaling, dynamic tone mapping, and AI genre selection for optimised picture quality. Gamers will appreciate features like G-Sync, FreeSync, and a 144Hz VRR. The smart TV runs on webOS 24, supports Apple AirPlay2 and offers a 60W audio system with Dolby Atmos and AI Sound Pro.

Sony Bravia 7

This 4K Ultra HD BRAVIA 7 Mini LED TV offers a 120Hz refresh rate and a mini LED display. Sony's 40W Acoustic Multi-audio with advanced audio technologies like Dolby Atmos also makes a difference. The display is powered by the XR Processor with features like XR Backlight MasterDrive, XR Contrast Booster, XR Triluminos PRO, and Dolby Vision for enhanced picture quality and motion clarity. The 120Hz refresh rate of the TV ensures that the gamers will not be left wanting for more when indulging in casual or semi-competitive gaming sessions. Sony's own PlayStation 5 series of consoles support high resolution and high-refresh rate gaming, making this TV a suitable pairing for them. Add to it the packed speaker array with four 10W speakers across models, and you have a TV not only fit for content consumption but also gaming.

Samsung QN800D

This is Samsung's flagship AI-ready TV with an 8K 120Hz display and a plethora of smart features like AI Upscaling, Multi-View and Ambient Mode+. It is powered by the NQ8 AI Gen2 processor. The display features Quantum Matrix Technology Pro for enhanced contrast and ultra-wide viewing angles. It supports HDR10+ and Dolby Atmos for immersive visuals and sound. The TV is equipped with Tizen OS, built-in voice assistants (Alexa, Google), and multiple smart features.

LG QNED 83

The 65-inch LG QNED83 TV offers a cinematic experience with its 4K UHD display and 120Hz refresh rate, ensuring vivid details and smooth motion. Dolby Vision and Dolby Atmos help it deliver immersive visuals and sound. The α7 AI Processor 4K Gen 6 enhances picture quality, and Filmmaker Mode preserves the original cinematic feel. Other highlights include AI Sound Pro, AMD FreeSync for gaming, and WebOS 23 with promised 5 years of upgrades.

Samsung QN90D

The Samsung QN90D is a premium 4K Ultra HD Neo QLED TV with impressive features, including a powerful NQ4 AI Gen2 processor for enhanced audio and video. It boasts a high peak brightness of 2,000 nits, Quantum Matrix Technology for improved local dimming, and supports HDR and HDR10+. The TV is equipped with a 4.2.2-channel speaker system with 60W output, and gaming features like 144Hz support and FreeSync Premium Pro.
