Sony Bravia Google TV XR-65A95L

The Sony Bravia A95L has a second-generation QD-OLED panel is one of the best 4K HDR TVs

to buy in India. The Cognitive Processor XR ensures that every frame brimms with life-like detail and vibrant color. Whether you're a cinephile or a gamer, the A95L promises a premium TV experience. The TV has support for both 2.4 and 5 GHz Wi-Fi, ensuring you will not experience significant lag when consuming content on the TV or playing casual games by loading them on the TV. You also have a four-speaker array for an immersive audio experience.

Samsung QN85D AI Smart Neo QLED TV

The Samsung QN85D offers great value with its bright Mini LED QLED display and smart AI features powered by

the NQ4 AI Gen2 Processor. Available in sizes from 55 to 98 inches, it delivers up to 144Hz refresh rate, HDR10+ support, and 40W Dolby Atmos audio. With Tizen OS and comprehensive connectivity options, it's an appealing mid-range TV for living rooms.

LG G3 OLED TV

While the LG G4 laden with AI features is also available in India, the last years LG G3 with MLA OLED panel continues to be a great buy. LG's WebOS 23 is fully compatible with major smart home ecosystems like Amazon, Apple, and Google, and supports all popular HDR formats. The 4.2-channel sound system delivers 60W of power, while 4 full-bandwidth HDMI ports, HGiG mode, and 4K 120Hz Dolby Vision make the LG G3 a compelling choice for gamers.

LG QNED 83 Smart TV

LG's new QNED series combines Nanocell and Quantum Dot technology. For a premium choice, the LG QNED 90T mini

LED offers advanced features, though it may be hard to find online. The mid-range LG QNED 83 delivers vibrant colors and wide viewing angles, though edge-lit dimming can be distracting in dark rooms. With the Alpha7 AI Processor Gen6 and WebOS 24, it provides a slew of smart features and a great experience for gaming and watching content. The TV is also suited for casual gaming, thanks to the panel being capable of respectable response times, which would help the gamers.

Sony Bravia 3

The Sony Bravia 3 is a mid-range TV in India, offering a 4K LED display powered by the X1 processor and a 60Hz refresh rate. It features a

Triluminous Pro display for an expansive color gamut and supports popular HDR formats such as HDR10 and Dolby Vision. You also get quality of life features like Dynamic Contrast Enhancer and Motionflow built into the TV. It also comes with 16GB of onboard storage to store all the apps that you would need. The audio setup on this TV includes a 10Wx2 speaker set, which has bass reflex built in, meaning you will not miss the thump in action packed scenes or games.
