Intel lays off over 2000 employees amid cost-cutting strategy

Intel has initiated the process of laying off its employees. As per the company, this is a part of the bigger cost-cutting strategy of the company. Intel announced that these layoffs are

in compliance with the Worker Adjustment and Retraining Notification (WARN) Act, which mandates advance

notice for large-scale layoffs. Initial reports suggest that these layoffs can affect over 2,000 Intel employees across facilities. This can include teams in Oregon, Arizona, California, and Texas. From what we know so far, the majority of the layoffs will occur in Oregon. Here, around 1,300 employees are affected. In Arizona, the number is expected to be around 385 employees while in California around 319 workers can lose their jobs across San Jose and Folsom, and 251 layoffs are planned for Intel's Austin, Texas, office. CEO Pat Gelsinger shared a broader plan to take this through while confirming the layoffs. <https://bit.ly/4htv9be>

■ APP MARKETPLACE

Google avoids immediate Play Store shake-up as judge pauses order

Google has temporarily avoided major changes to its Play Store as a US federal judge blocked an injunction in its ongoing legal battle with Epic Games. The case, part of a larger antitrust lawsuit, accuses Google of unfairly controlling the Android app market and stifling competition. On October 7, US District Judge James Donato issued an injunction that could have forced Google to make significant changes, such as allowing alternative payment systems within apps and stopping payments to device manufacturers for pre-installing the Google Play Store. <https://bit.ly/4e7yslo>

Elon Musk's Starlink coming to India?

Elon Musk has been trying for a while now to enter India's satellite broadband market with Starlink. India's own telecom giants such as Reliance Jio and Bharti Airtel are not really happy with it. Recently, India's telecom minister, Jyotiraditya Scindia, confirmed that satellite spectrum will be allocated administratively, aligning with global trends, rather than through auctions. However, Mukesh Ambani and Sunil Mittal, who heads Jio and Airtel respectively, wanted auctions. This decision of the government works more in favour of Musk's Starlink. <https://bit.ly/3YLdch0>

Instagram launches profile cards

Instagram has introduced a new feature called profile cards that aims to make this process smoother and more stylish. Designed to function like a digital business card, this feature is rolling out globally, offering users an easier way to connect and share their profiles. The concept behind the profile cards is simple but effective. Instead of just giving someone your handle, you can now share a two-sided card that provides a snapshot of your Instagram profile. <https://bit.ly/3NN4CYx>
