Former OpenAI CTO Mira Murati starts raising funds for her new AI startup

Last month, Mira Murati, who served as the Chief Technology Officer (CTO) at OpenAI, announced her resignation after six years at the company. Now, she is reportedly taking steps to start her own AI venture. Murati is reportedly raising funds from venture capitalists for her new startup, which aims to develop AI products based on proprietary models.

Though the fundraising talks are still in the early stages, the startup could secure more than \$100 million, given Murati's established reputation in the AI field, reports Reuters. However, the final figures are yet to be confirmed, and it remains unclear if Murati will assume the CEO position at her new venture.

Google's AI model will help Indian companies detect blindness in diabetic patients

Google has long believed in the power of artificial intelligence (AI) to solve some of the toughest problems. With this belief, the tech giant has been actively working in India for the past five years, partnering with local organisations to adapt its AI solutions to better serve communities. The tech giant has announced new collaborations in health, agriculture, and sustainability that aim to harness AI for various applications.

iOS 18.1 with Apple Intelligence is coming

For a couple of months now, Apple has been talking a lot about Apple Intelligence. The Cupertino-based tech giant first spoke about Apple Intelligence during its WWDC conference in June. The new iPhone 16 series was also promoted as "AI-ready". But Apple unveiled its latest iPhone

16 series back in September without it. Now, finally, after a long wait to witness Apple Intelligence, the company is finally rolling out these AI features with a new iOS 18 update.

Apple will soon roll out Apple Intelligence features with the iOS18.1 update. However, with this update, only the initial few AI features will be brought out, the other features will be rolled out with subsequent updates. <http://bit.ly/3AeyABO>
