Inside Flipkart's Big Billion Days

Automation, new features, and tackling customer trust challenges

Mustafa Khan | mustafa@digit.in

Flipkart is currently running one of its biggest sales of the year- the Big Billion Days sale. Over the years, it has become the company's flagship festive season sale during which it serves millions of orders across India. Last week, I visited Flipkart's biggest warehouses- the Malur facility in Bengaluru and spoke with Jeyandran

Venugopal, CPTO at Flipkart, and Pranav Kumar Tiwari, SVP at Flipkart to better understand how the company offers big discounts, ensures no scam and counterfeit product cases, and how it is using the latest tech to ensure smooth operations.

The scale of operations at Flipkart's Malur facility is nothing short of impressive. I was struck not only

by its sheer size but also by the synchronised efficiency of its workers and systems.

One highlight was the use of AGVs—automated guided vehicles—zipping across the warehouse without human intervention. When I inquired about this automation, Jeyandran, assured me that the AGVs were implemented to assist employees, not to replace them. It's clear that while technology is increasingly playing a role, Flipkart is focused on enhancing human productivity rather than cutting jobs.

I also had the opportunity to ask Jeyandran about upcoming features on the Flipkart app. One of the most exciting additions is the "Price Lock" feature, designed to ease pre-sale anxiety. "We will give customers an indicative price before the sale," he explained. "You can lock in that price, and when the sale goes live, we guarantee that you'll receive the lowest price available, redeemable within 48 hours."
